

AI Orchestration Platform for Revenue Cycle Teams

Payer rules and behavior constantly change, causing denied claims and revenue loss. Reclaim the revenue you deserve with Adonis Intelligence, **the first AI-powered orchestration platform for RCM.**

Our orchestration layer is what sets us apart: it connects every insight to action, coordinating the right agent, workflow, or automation to resolve issues from start to finish. The result? A self-optimizing system that **gets smarter with every claim and delivers measurable outcomes across the entire revenue cycle.**

Denials Increased

78% ↑

Humana with ICD S02.50 and CPT 99285 denials are 78% higher than average due to coding denials.

Review and Correct Coding Errors

Verify that ICD S02.50 and CPT 99285 are correctly assigned. Update coding based on the payer policy changes.

AI Agents

Search by task name and agent type.

Recently Assigned

Assigned Task	Status	Agent Type	Est FTE Savings	Assigned
VA Authorization Fix	Active	Pre-Cert	3.1	10:05 PM
Athena Health Eligibility	Active	Eligibility	1.9	Yesterday
Payer Rule Compliance Check	Active	Denials	5.7	Monday

Step 1
Detect Missing Authorization Number for the Payer

Step 2
Assign AI Agent to Handle the Request

Step 3
AI Agent Initiates Payer Call

Step 4
AI Agent Retrieves Authorization Number **VA3-240307-7589**

Step 5
AI Agent Validates Information Format & Number Logic

Step 6
AI Agent Updates Claim & Routes for Pre-Submission Check

Proactive, Real-time Monitoring & Alerting

Adonis provides real-time monitoring and personalized alerts to detect anomalies, track revenue performance, and help your team confidently address high-impact RCM challenges.

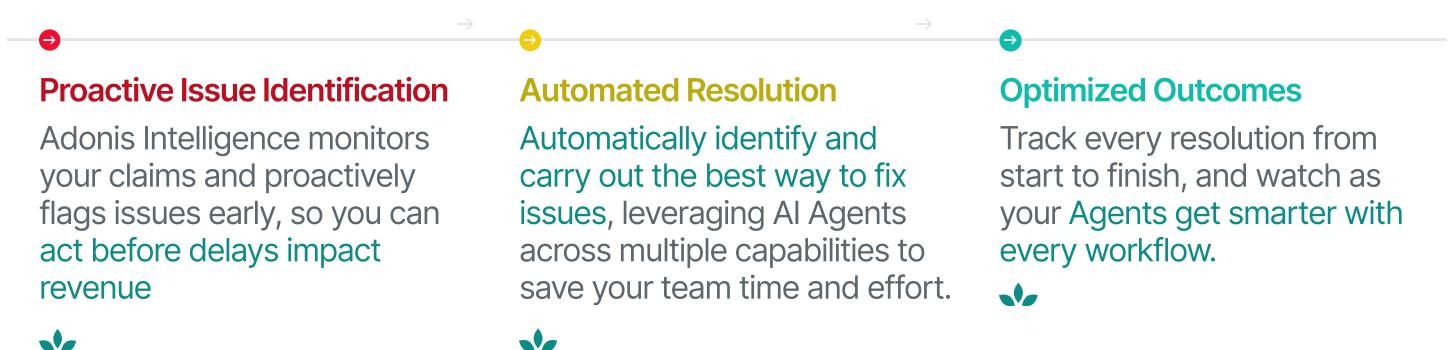

The First Orchestration System Built For RCM

Future-proof your RCM with a platform that intelligently orchestrates and deploys the right resolution, reduces manual work, and adapts as your needs evolve.

Intelligent Automated Resolutions

Accelerate time to value with a platform that simplifies high-friction RCM workflows using smart automation — delivering results from day one.

Adonis in Action

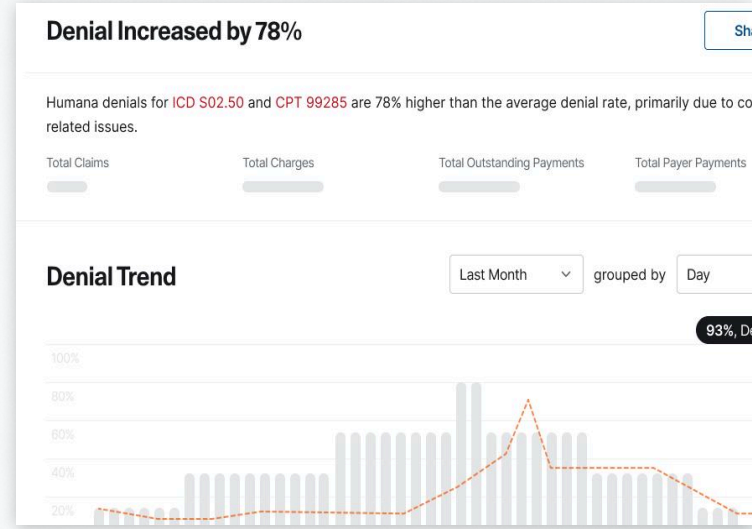

Maximizing Financial Outcomes for Healthcare Providers

Confidently stay ahead of shifting payer rules with a future-proof RCM strategy. Adonis Intelligence and AI Agents work together to adapt in real time, deploying the right solution and surfacing payer trends and policy updates that drive smarter, faster resolutions.

Adonis Intelligence

Continuously analyzes your RCM data for anomalies and areas for improvement across your operations. It serves as the orchestration layer, informing the right capabilities to bring resolution.

- Coordinates the right agent capabilities to resolve issues effectively
- Uncovers emerging payer trends and policy shifts to guide issue resolution at the root
- Learns from resolutions across our entire customer base and always improving

Adonis AI Agents

Using insights from Intelligence, we orchestrate action through our agentic capabilities to carry out the highest-friction areas of the revenue cycle on behalf of your team.

- We enable high-value workflows like claim status inquiry, timely filing, documentation follow-up by combining capabilities across Voice AI, RPA, eFax, Appeal Generation, Eligibility API, and more.
- Adapts to payer behavior and learns with every interaction to deliver faster, smarter results
