

# Equum Medical Announces Milestone Achievement: Over 1-Million Monitored Hours annually at recently expanded Virtual Care Collaboration Center

June 18, 2024

Article written by [Equum Medical](#)

**NEW YORK CITY, NY / ACCESSWIRE / June 18, 2024 /** Equum Medical, a leader in telehealth-enabled clinical services, proudly announces a significant milestone achievement: surpassing over 1 million monitored hours per year through its recently expanded state-of-the-art [Virtual Care Collaboration Center \(VCCC\)](#). This accomplishment underscores Equum Medical's commitment to addressing the critical workforce shortages in healthcare by leveraging advanced telehealth solutions. The VCCC has achieved significant national operational volume through this Brentwood, Tennessee-based location and forecasted implementations may in fact double the output by years end.

**Addressing Workforce Shortages with Telehealth Innovation**

The healthcare industry continues to face unprecedented workforce shortages, exacerbated by the COVID-19 pandemic. These shortages have intensified the need for innovative solutions to ensure high-quality patient care. Telehealth has emerged as a critical tool in bridging these gaps, offering flexibility, scalability, and enhanced access to healthcare services. Serving both as a monitoring HUB and Center of Telehealth Innovation, the VCCC encourages customer co-creation and ideation sessions with the ability to demonstrate the services at the same location.

"We are incredibly proud to announce that our Virtual Care Collaboration Center has surpassed over 1 million monitored hours per year," said [Dr. Corey Scurlock, MD, MBA CEO](#) & Founder of Equum Medical. "This milestone reflects our dedication to leveraging technology to provide high-quality care and support healthcare providers across a range of service lines, connecting care across the acute continuum."

### **Equum Medical's Virtual Care Collaboration Center: A Comprehensive Telehealth Solution**

Equum Medical's Virtual Care Collaboration Center offers a suite of telehealth services designed to enhance patient care and support healthcare providers. The center's comprehensive services include:

- [Virtual Nursing](#): Providing remote nursing support to assist bedside nurses, optimize patient care, and reduce burnout across admission, hospital stay and discharge models.
- [Virtual Sitter](#): Ensuring continuous patient monitoring to prevent falls and other incidents, enhancing patient safety.
- [Telemetry](#): Offering real-time monitoring of patients' vital signs, allowing for timely interventions and improved clinical outcomes.

### **Universal Technology Approach**

Equum Medical employs a Universal Technology Approach, partnering with a trusted [Partner Ecosystem](#) to support broad technology implementations by hospitals and health systems. This model ensures that the telehealth services seamlessly integrate with existing systems, optimizing delivery and enhancing the capabilities of healthcare providers. This flexibility allows for smoother transitions and greater adoption rates, ultimately improving patient care and operational efficiency.

"Equum Medical's Virtual Care Collaboration Center is a game-changer in the telehealth space," added [Kristen Lawton, Chief Nursing Officer](#), "our telehealth services are reshaping nursing care models by extending the reach of healthcare beyond traditional boundaries and improving healthcare outcomes for diverse populations."

### **Impact on Healthcare Delivery**

The Virtual Care Collaboration Center's services are integral to improving healthcare delivery by ensuring that patients receive continuous, high-quality care regardless of location. By integrating virtual nursing, sitter, and telemetry services, Equum Medical helps healthcare providers manage patient care more effectively, reduce operational costs, and mitigate the impact of workforce shortages.

### **Looking Ahead**

As Equum Medical continues to expand its telehealth services, the company remains committed to innovation and excellence in healthcare delivery. Surpassing 1 million monitored hours per year is a testament to Equum Medical's journey to transform healthcare through technology and collaboration.
