

/ SEARCH AND SCHEDULE FOR ADMIN USERS

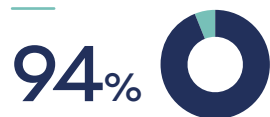

Care transitions made easy

Lock down referral leakage and streamline follow-up care with Search and Schedule for Admin Users.

Patients often struggle to find appropriate follow-up care, leading to delays and referral leakage.

Equip your front-office and call center staff to identify and schedule the right follow-up providers for patients, before they leave your office, ensuring revenue stays within your system.

Referral leakage is bleeding your bottom line

Accurate and simple provider search and schedule for front offices

Unlock even more efficiency with CRM Connect combining the power of your detailed patient information with the robust provider, location and availability data of Kyruus Health, embedded directly into Microsoft Dynamics or Salesforce.

Reduce referral leakage

Ensure patients leave with their next appointment booked, by empowering staff with an intuitive provider search tool, providing visibility into the entire provider network.

Expedite patient access

Facilitate seamless appointment scheduling leveraging a direct EHR connection. With the ability to integrate into your CRM system, you can accelerate patient access and satisfaction.

Search and Schedule

Remove administrative burden

Centralized data sources capture referral instructions, empowering front-office or call center staff to confidently schedule appointments.

Ensure care continuity

Boost appointment adherence by proactively booking follow-ups, crucial for managing chronic conditions and improving long-term health outcomes.
