

# Digital Health at Scale

Centralizing integration, deployment, monitoring and governance of digital health

Xealth is making digital health a reality for health systems, who are pointing digital health initiatives towards productivity, cost of care, access to care and outcomes measures.

Through Xealth's digital health platform, health systems can easily aggregate, order, and distribute digital health tools, education and programs using the EHR and existing IT systems, as well as capture monitoring information back in the EHR.

Xealth helps administrators assess the performance of their digital engagement offerings through analytics and customizable dashboards.

## One Integration

With Xealth, all distribution and monitoring activity flows through a single, centralized integration, creating a standardized experience for all deployments and use cases.

## Digital Health: A Driver of Growth

### Increase Patient Loyalty & Engagement

Digital content and programs provide a convenient option for patients to access care and information, ensuring the patient stays with the health system

### Expand Access to Care

Expand and scale geographically, using virtual tools to avoid adding cost, while demonstrating commitment to underserved communities

### Highlight Key Service Lines

Providers expand patient volume and practice at the top of their license through virtual care initiatives

## Digital Engagement: Key Components

### Patient Education

Videos, documents

### Apps & Programs

Downloadable Mobile Apps

### Devices & RPM Kits

RPM Platforms, Connected Devices

### Non-Clinical Services

Product Delivery, Transportation, Meal Delivery

Xealth reaches **314 hospitals** with nearly **90,000 providers**  
and more than **35 million visits**

# Xealth – A Complete Digital Health Platform

An ecosystem of assets and tools working together to achieve clinical, financial, and strategic objectives

## Xealth Clinical Interface

### Distribution & Monitoring

Order, deliver, and monitor all digital health tools from the EHR, manually or automatically, using clinical decisions support

## Xealth Integration Layer

### Digital Vendor Ecosystem

Centralized management that supports organization and deployment of multiple solutions through single integration

## Xealth Digital Command Center

### Analysis & Reporting

Customized reporting of patient and provider engagement and activation

## The Value of Xealth

Better Patient Experience

**65%+**

engagement rates on distributed content and assets

Faster & Easier Deployment

**50-80%**

reduction in integration and deployment costs

Save Provider Time

**2-3 minutes**

saved per visit by reducing number of clicks

Improve Financial Outcomes

**2-5 times**

improvement in key measures e.g. reducing readmits, no shows

## Network of Clients & Investors

The Xealth client and investor network is charting the course for digital health, sharing, and creating best practices as they build their digital ecosystems. Our partners include:

## Team Xealth

Xealth was founded by a team of consumer technology experts who had successful careers in cell phone, website, and interactive technology. In 2016, they joined Providence St. Joseph Health and saw an opportunity to apply their knowledge of digital technology to better connect doctors and patients using everyday tools – for clinicians, the EHRs, for consumers, their smartphones and computers. In 2017, Xealth was spun out, adding health care experts and engineers. The team now comprises more than 60 members, including clinical informaticists, health IT record specialists, and health care business professionals.
