

Community Wellness

Who is Community Wellness?

Community Wellness was founded with the mission of empowering health, wellness, and prevention through innovation.

We deliver a world-class technology and coaching platform that improves patient health outcomes, through HIPAA-compliant RPM devices, best-in-class clinical coaching, and robust data analytics – an offering that we call Remote Patient Monitoring Plus (RPM+).

Community Wellness partners with health plans, hospitals, and other large care facilities and acts as an extension of care, ensuring that patients are monitored outside of the physician clinic or hospital.

RPM+ services include:

- ✦ Clinical Health Coaching – certified health coaches trained in patient care and chronic disease management meet with patients one-on-one with patients in live sessions to set goals to help improve their conditions.
- ✦ HIPAA-Compliant, Bluetooth-Enabled Devices/ Management – we provide HIPAA-compliant health monitoring devices to help patients manage an array of conditions, such as COPD, CHF, T2 diabetes, COVID, and pneumonia.
- ✦ Powerful Data Sharing and Analytics – get regular health data updates from your patients in real time as they take vital sign measurements from provided devices.
- ✦ Alert Triage – get notified about patient vital signs outside of normal parameters immediately so that you can determine if intervention is necessary, such as an ED visit.

Community Wellness takes a wellness-focused approach to health management, empowering those in our care with the tools they need to improve their quality of life while managing and, often, improving their chronic health conditions.

83.3% of CW patients surveyed feel they are more aware of their health and the steps they need to take to stay healthy

50% of CW patients surveyed say they are more compliant with taking their medications after 8 weeks with RPM+

90% of CW patients surveyed say taking their vital signs is simple and convenient

100% of CW patients surveyed agree that their clinical health coach genuinely cares about their health and quality of life
