# We have experience leading education based telehealth deployments in some states already.

---

## Florida Schools Telehealth Deployment

1. The program was part of First Lady Casey DeSantis' "Hope for Healing" mental health initiative, allowing students to meet with remote mental health providers during school hours. This eliminated the need for students to miss school and for parents to miss work to take children to appointments.
2. Initially deployed over 120 telemedicine stations (kiosks, tablets) across 63 schools in Hurricane Michael-affected areas. These kiosks included vitals monitors for medication management visits.
3. Deployment was completed in just 43 days, ahead of the school year start in August 2019.
4. Collaborated with First Lady Casey DeSantis, NWF Health Network CEO Mike Watkins, Florida DCF, and others.
5. Provided ongoing tech support, field support, training (onsite & virtual), and reporting to all stakeholders.
6. Expanded to multiple other counties and school districts throughout Florida in the following years.
7. Supplemented Florida's network of providers with contracted mental health therapists to serve rural schools with limited access to care.
8. Developed and deployed custom case management software solutions for the Broward Behavioral Health Coalition, which served the largest school district in the U.S. (Broward County School District).

## West Virginia School Enactment

1. Focused on providing primary care services to schools in the state.
2. Deployed kiosks and medical devices (BP, Pulse/Ox, ECG, exam camera, stethoscope) in schools to allow a 501(c)(3) primary care provider to deliver remote care to students during school hours.

## GlobalMed's Deep Roots in Arizona

GlobalMed is proud of its Arizona roots, with over 100 employees and a 50,000 square foot experience center and production facility located in Scottsdale. We are committed to helping our children receive the care they deserve. GlobalMed has the knowledge, expertise, and technology to support this initiative. We are ready to make a real and lasting impact for years to come.
