Transforming Healthcare Operations

AiRISTA's Strategic Promise to Deliver Measurable Savings Through Operational Optimization

Who is AiRISTA?

AiRISTA products and services positively affect the healthcare industry using **RTLS solutions that provide real results and data-driven insights**.

Use Case Example

Using AiRISTA's sofia platform in healthcare environments has significant benefits for medical professionals and patients alike. Tags provide visibility into the location of critical assets, staff, and patients. By integrating location visibility with additional applications, improved workflows enable caregivers to spend more time with patients while feeling more safe and secure.

Proven Outcomes

- Increase the number of patients seen each day
- Improve patient experiences with more predictable wait times
- Ensure staff safety knowing help is on the way with just a "pull of a tag"
- Create a culture where staff safety is of utmost importance
- Expedite response times to staff or patient alerts
- Reduce capital spend on equipment
- Minimize loss of medications and samples

Available Healthcare Products & Services

Personnel Safety	Asset Tracking	Patient & Staff Flow	Temperature Monitoring	Wander Management	Hygiene & Compliance
Broadcast instant alerts to security and staff personnel.	Track assets such as medical equipment and supplies in real time.	Manage patient flow in coordination with bed management and staff location. Devices, Infrastructure, & AiRISTA'S Sofia Software Platform:
A Cutting Edge Solution

Tags & Sensors

- Immediate notifications for healthcare workers in distress with two-way communication.
- Track medical equipment and other hospital assets.
- Ensure optimal storage conditions and maintain regulatory compliance.

Wireless Infrastructure

Utilize your existing infrastructure! AiRISTA can also provide a variety of options that extend your network and dial-in the location accuracy required for each use case. Implementing bluetooth low-energy (BLE) devices allows you to track more, for less.

Meet: Sofia

AiRISTA's RTLS Software Platform, Sofia, is made for an IOT world going above and beyond simple track and trace. Create your own workflows that are specific to your organization to better coordinate patients, staff, and equipment.

Take your real-time location services one-step further with AiRISTA.

Listed by Gartner as a World Leader in RTLS Healthcare Solutions

AiRISTA is the **only Premier partner** listed in the leaders quadrant for Gartner's Magic Quadrant for Indoor Location Services.

"AiRISTA is in the top third for all uses cases in this research. It scores particularly well on people tracking use cases, driven by its strong portfolio of people tags..."
