

Tele-ICU

Hicuity Health tele-ICU provides the critical care attention you need to support your staff and improve patient outcomes. More than 15 years of experience, 100 client partnerships, and our proprietary HUB workflow management platform enable the customization of care to meet your hospital or system needs.

BENEFITS

Improved Clinical Outcomes

Continuous intensivist-led critical care is proven to reduce patient mortality and ICU length of stay while improving ventilator management, glycemic control, and other key ICU metrics.

Support/Satisfaction for Bedside Team

Around-the-clock availability of the Hicuity Health clinical team provides your hospital teams with support and job satisfaction, reducing burnout and turnover.

"System-ness" + Customization

Hicuity's continuous multi-hospital presence helps you deliver the preferred level of care consistency across your system footprint with appropriate customization to each facility's needs.

Trusted Collaboration

Hicuity's experience, expertise, and collaborative approach to care ensures trusted partnerships with your ICU team.

Leapfrog Compliance

Tele-ICU care, delivering intensivist-led care plans and rapid response, contributes toward top-score achievement in Leapfrog Group ratings.

Consistent ROI

Hicuity clients consistently report 2-6X ROI on their tele-ICU investment.
