OUR LIFTIMO TEAM

Liftimo

About Us.

WELCOME TO LIFTIMO. LET'S CARE BETTER, TOGETHER.

Our Story

Fifteen years ago, my journey in caregiving began in Arizona.

As a full-time caregiver in an assisted living home, I spent my days caring for seniors sharing their laughter, easing their struggles, and learning the true meaning of compassion. Those years were transformative, not just for the residents I served, but for me as well. I saw the challenges caregivers faced daily: the physical strain, the emotional weight, and the constant demand for more resources and support.

My wife, who stood by my side through it all, shared my passion for making a difference. Together, we dreamed of a better way, a way to empower caregivers and enhance the lives of seniors. We knew that with the right tools, we could create a future where caregiving was not just manageable, but truly impactful.

Driven by our shared vision, we founded **Liftimo**. Combining my hands-on caregiving experience with her unwavering support and insight, we set out to develop a solution that would address the challenges we had witnessed firsthand.

After years of hard work, collaboration, and innovation, we created a device designed to support both caregivers and residents, making daily care safer, easier, and more dignified.

At Liftimo, we believe that care is a partnership—between technology and humanity, between caregivers and those they care for, and between my wife and me. Our journey is a testament to the power of love, empathy, and determination. Together, we are committed to creating a world where caregiving is not just a responsibility, but an opportunity to uplift and inspire.

MARIUS & ESTHER, LIFTIMO FOUNDER

THIS IS OUR STORY—A STORY OF TWO PEOPLE WHO SAW A NEED AND DECIDED TO ACT. A STORY OF PARTNERSHIP, PERSEVERANCE, AND A SHARED BELIEF IN A BETTER FUTURE.

OUR PROJECT

At Liftimo, we are driven by a singular mission: to solve real-world problems through innovative, practical, and compassionate solutions. Our project is rooted in addressing the challenges faced by caregivers and seniors in assisted living environments, where the demands of daily care can often feel overwhelming

PROJECT 1 - LIFTIMO WAS CREATED

TO ADDRESS THESE CHALLENGES

The Problem

Caregiving is one of the most demanding and emotionally taxing roles, yet it is also one of the most vital. Caregivers in assisted living homes and private settings often face:

- **Physical Strain:** Lifting, transferring, and assisting seniors can lead to injuries and long-term health issues for caregivers.
- **Emotional Stress:** The constant pressure to provide high-quality care while managing time and resources can take a toll on mental well-being.
- **Limited Resources:** Many caregivers lack access to tools and technologies that could make their work safer, easier, and more efficient.
- **Quality of Life for Seniors:** Without the right support, seniors may experience reduced independence, dignity, and comfort in their daily lives.

Our Solution

Liftimo was created to address these challenges head-on. We have developed a groundbreaking device designed to:

- **Empower Caregivers:** Our solution reduces physical strain, minimizes the risk of injury, and streamlines daily caregiving tasks, allowing caregivers to focus on what truly matters—building meaningful connections with those they care for.
- **Enhance Senior Well-Being:** By providing safer and more efficient care, our device helps seniors maintain their independence, dignity, and quality of life.
- **Innovate with Purpose:** Combining cutting-edge technology with user-friendly design, our product is built to be accessible, intuitive, and adaptable to various caregiving environments.

WHY LIFTIMO ?

Why Liftimo?

- **Rooted in Experience:** Founded by a former caregiver with 15 years of hands-on experience, **Liftimo** is built on a deep understanding of the challenges caregivers and seniors face every day.
- **Problem-Solving at Its Core:** We don't just create products—we create solutions. Every feature of our device is designed to solve a specific problem, making caregiving safer, easier, and more effective.
- **Compassion-Driven Innovation:** At **Liftimo**, we believe that technology should serve humanity. Our solutions are not just about functionality—they're about improving lives.

Our Vision

We envision a future where caregiving is no longer a burden but an opportunity to connect, empower, and uplift. Through our innovative solutions, we aim to transform the way care is delivered, making it safer, more efficient, and more compassionate for everyone involved.

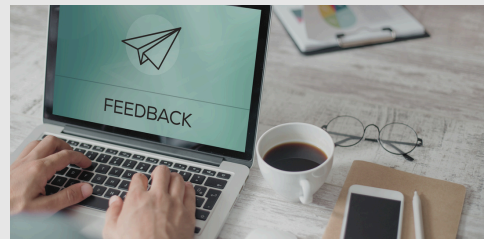

Join us as we redefine caregiving—one solution at a time. Together, we can create a world where caregivers and seniors thrive.

Welcome to Liftimo

Let's solve problems, together.

We actively listen to feedback from caregivers, seniors, and healthcare professionals to ensure our solutions remain relevant, effective, and impactful. Our goal is not just to meet the needs of today but to anticipate the challenges of tomorrow, creating a lasting positive impact on the caregiving community

YES, LIFTIMO fills the gap

The Gap in the Market

Current solutions like **Hoyer Lifts** and **Sit-to-Stand Lifts** address specific needs but often fall short in providing a holistic, caregiver- and resident-friendly solution. These devices:

- **Lack Versatility:** They are often designed for specific scenarios (e.g., full lifts or partial weight-bearing), limiting their usefulness in diverse caregiving situations.
- **Compromise Comfort:** Residents may feel unstable, uncomfortable, or undignified during transfers.

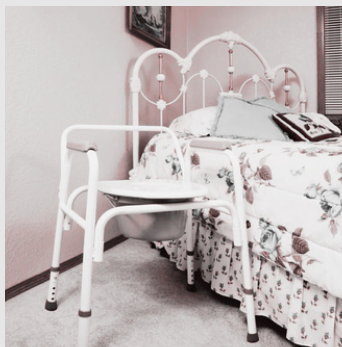

How Liftimo Fills the Gap

Liftimo is designed to address these shortcomings with a pivot-free, versatile, and compassionate approach:

1. **Eliminates Pivoting:** By allowing caregivers to transfer residents without twisting or lifting, Liftimo significantly reduces the risk of injuries for caregivers and ensures a smoother, safer experience for residents.
2. **Versatile Design:** Liftimo works seamlessly across a variety of transfer scenarios—4-in-1 assistive device - commode, shower chair, wheelchair, and lift. This versatility makes it a one-stop solution for caregivers.
3. **Prioritizes Resident Dignity:** The 180-degree opening seat and secure locking mechanism ensure residents feel stable and comfortable during transfers, enhancing their sense of dignity and well-being.
4. **Reduces Caregiver Strain:** Liftimo's ergonomic design minimizes physical effort, allowing caregivers to focus on providing compassionate care rather than worrying about their own safety.
5. **Improves Efficiency:** By streamlining the transfer process, **Liftimo** saves time and energy, making caregiving more manageable and less exhausting.

YES, LIFTIMO FILLS THE GAP—AND IT DOES SO WITH INNOVATION, COMPASSION, AND A COMMITMENT TO A BETTER FUTURE FOR CAREGIVING.

LIFTIMO – the ultimate 4-in-1 assistive device

Liftimo: The 4-in-1 Caregiving Solution for Unmatched Efficiency

In the world of caregiving, efficiency isn't just a luxury—it's a necessity. Caregivers juggle multiple tasks, from transferring residents to assisting with daily activities, all while ensuring safety and comfort. That's why **Liftimo was designed as a 4-in-1 solution**, combining versatility, innovation, and practicality to meet the diverse needs of caregivers and residents.

Why Liftimo Stands Out

- **No Pivoting, No Strain:** Liftimo eliminates the need for pivoting, reducing the risk of caregiver injuries and making transfers safer and easier.
- **All-in-One Functionality:** Liftimo handles bed, toilet, and shower transfers with a single device, saving time and simplifying caregiving tasks.
- **Resident-Centered Design:** Liftimo prioritizes the comfort, safety, and dignity of residents, ensuring they feel supported and respected during every transfer.

CHOOSE LIFTIMO—WHERE EVERY TRANSFER IS SAFE, SMOOTH, AND DIGNIFIED.

• The electric lift transfer chair provides a convenient and secure way to transport patients. caregivers can lift patient easily by pressing a button and transfer patient to bed, bathroom, toilet or else.

LIFTIMO's Pivot-Free Design

No Pivoting, No Problem: The Advantages of Liftimo's Pivot-Free Design

Pivoting during transfers is one of the most physically demanding and risky aspects of caregiving. **Liftimo's pivot-free design** eliminates this challenge, offering a safer, more efficient, and more compassionate solution for caregivers and residents alike. Here are the key advantages of no-pivoting transfers with **Liftimo**:

Advantages for Caregivers

1. **Reduced Risk of Injury:** Pivoting often requires caregivers to twist their bodies while supporting the resident's weight, leading to back, shoulder, and joint injuries. **Liftimo's pivot-free design** eliminates this twisting motion, significantly reducing the risk of musculoskeletal strain and long-term injuries.
2. **Less Physical Strain:** Without the need to pivot, caregivers can perform transfers with minimal physical effort, preserving their energy and reducing fatigue.
3. **Improved Efficiency:** Pivot-free transfers are faster and more straightforward, allowing caregivers to complete tasks more efficiently and focus on other aspects of care.
4. **Enhanced Confidence:** Liftimo's secure locking mechanism and smooth transfer process give caregivers peace of mind, knowing they can safely assist residents without risking injury.

Advantages for Residents

1. **Greater Comfort and Safety:** Pivoting can be uncomfortable and unsettling for residents, especially those with limited mobility or cognitive impairments. **Liftimo's pivot-free design** ensures a smooth, stable transfer, enhancing the resident's comfort and sense of security.
2. **Preserved Dignity:** Pivot-free transfers feel more natural and dignified, reducing the emotional stress often associated with being lifted or moved.
3. **Reduced Risk of Falls or Injuries:** Without the need to pivot, residents are less likely to lose their balance or experience friction or shearing during transfers.
4. **Faster, Smoother Transfers:** Residents benefit from a quicker, more seamless transfer process, minimizing disruption to their daily routines.

Advantages for Caregiving Facilities

1. **Lower Caregiver Turnover:** By reducing physical strain and the risk of injury, **Liftimo helps facilities** retain experienced caregivers, improving continuity of care.
2. **Increased Productivity:** Faster, more efficient transfers mean caregivers can spend more time on other important tasks, enhancing overall productivity.
3. **Improved Resident Satisfaction:** Residents who feel safe, comfortable, and respected during transfers are more likely to have a positive experience, boosting satisfaction and quality of life.
4. **Cost Savings:** **Fewer caregiver injuries** mean lower workers' compensation claims and reduced costs associated with staff turnover and training.

Why No Pivoting Matters

Pivoting isn't just a minor inconvenience—it's a significant source of physical and emotional strain for caregivers and residents. By eliminating the need to pivot, **Liftimo** is transforming the caregiving experience, making it safer, more efficient, and more compassionate for everyone involved.

Choose Liftimo—where no pivoting means no compromises.

Who Needs LIFTIMO?

Who Needs Liftimo? 7 Health Conditions Liftimo Can Help With

1. Multiple Sclerosis (MS) - MS can cause muscle weakness, balance issues, and mobility challenges. Liftimo provides safe and stable transfers, reducing the risk of falls and supporting independence in daily activities.

2. Parkinson's Disease - People with Parkinson's often experience tremors, stiffness, and difficulty moving. Liftimo's secure and easy-to-use design helps individuals navigate their daily routines with greater stability and confidence.

3. Stroke Recovery - After a stroke, mobility and strength can be significantly affected. Liftimo assists with safe transfers, bathing, and toileting, promoting a smoother and safer recovery process.

4. Spinal Cord Injuries (SCI) - Individuals with spinal cord injuries often require assisted transfers. Liftimo's lifting mechanism and ergonomic design help caregivers move patients safely, reducing strain and injury risks.

5. Arthritis & Joint Disorders - Chronic pain and stiffness from arthritis can make standing and moving difficult. Liftimo provides a comfortable and supportive solution for daily mobility, reducing pressure on joints.

6. Elderly Fall Prevention - Seniors are at high risk of falls in the bathroom and home. Liftimo's secure seating, stable frame, and easy transfer system help reduce fall risks and increase confidence in everyday activities.

7. Post-Surgery or Injury Recovery - Individuals recovering from surgery, such as hip or knee replacements, need extra support during rehabilitation. Liftimo aids in safe movements and transfers, making recovery easier and safer.

Testimonials from Clients

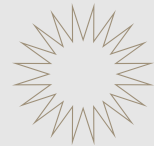

Sarah T.

"Liftimo has been a lifesaver for my mom and our family. Before, transferring her from bed to the shower was a huge challenge, and it often left her feeling anxious. With Liftimo, the process is so smooth and comfortable. She feels safe, and I feel relieved knowing she's in good hands. Thank you, Liftimo!"

James L.

"I've always hated feeling like a burden during transfers, but Liftimo has changed everything. The pivot-free design makes me feel stable and dignified. It's made my daily routine so much easier, and I can't recommend it enough!"

Maria G. Home Caregiver

"As a caregiver, my back used to ache every day from lifting and pivoting. Liftimo has completely changed the game for me. It's so easy to use, and I no longer worry about injuring myself. It's not just a device—it's a lifesaver for caregivers like me."

David P.

"Liftimo has made my job so much easier. The 180-degree seat design is genius, and the fact that it's waterproof means I can use it for shower transfers without any hassle. It's efficient, safe, and my residents love it. What more could I ask for?"

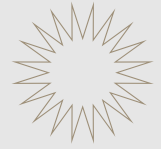

Emily R. RN

"In our facility, we've seen a significant reduction in caregiver injuries since we started using Liftimo. It's FDA-compliant, easy to clean, and the residents feel so much more comfortable during transfers. It's a win-win for everyone!"

Carlos M., BSN

"Liftimo has streamlined our transfer process and improved the quality of care we provide. The pivot-free design is a game-changer, and our staff loves how intuitive and reliable it is. It's become an essential tool in our facility."

Conclusion.

Is Liftimo for Every Case? – No.

Liftimo is a revolutionary assistive device designed to enhance mobility and reduce fall risks, but it's not a one-size-fits-all solution. Every individual has unique needs, levels of mobility, and caregiving requirements. While Liftimo can be a life-changing tool for many, there may be cases where additional medical equipment, rehabilitation, or specialized care is necessary. We always encourage consulting with healthcare professionals to determine the best solutions for each specific situation.

Is Liftimo a Miracle Device? – No.

There are no miracle devices in healthcare—only thoughtfully designed solutions that improve lives. Liftimo cannot cure medical conditions or eliminate the need for hands-on care, but it can significantly reduce physical strain, minimize fall risks, and provide a safer, more comfortable transfer experience. It's not magic—it's smart engineering, built with real-life challenges in mind.

Is Liftimo a Safer and Smarter Solution? – Yes!

While it may not be the perfect fit for every individual, Liftimo has proven to make a tremendous impact in both home and professional care settings. By combining the functionality of a commode, shower chair, wheelchair, and lift in one, Liftimo simplifies daily tasks, enhances mobility, and supports caregivers in providing safe and dignified assistance. Its sturdy, medical-grade construction ensures long-term durability, making it a practical, reliable, and cost-effective investment for those in need of mobility assistance.

Is Liftimo the Right Choice for You? – Only You Can Decide.

Choosing an assistive device is an important decision, and we understand that each case is different. If you or your loved one experiences mobility challenges, frequent falls, or difficulty with transfers, Liftimo could be a valuable solution to enhance safety and ease caregiving. However, we encourage you to explore all available options, consult with professionals, and determine what best suits your unique needs.

One Thing is Certain – Safety Matters.

At the heart of Liftimo is a commitment to protecting individuals from unnecessary falls, injuries, and discomfort. Whether in a home, rehabilitation center, or nursing facility, our goal is to provide a safer and more efficient way to assist with mobility. While it may not be a solution for every case, for many, it can be the difference between struggling with transfers and experiencing safe, independent living.

♥ **Liftimo – Because Safety and Comfort Matter.**
