

# Capture Your Differential

Clinical AI reviews every chart for **100% accuracy** for revenue integrity: **5:1 ROI guaranteed**

**Every discharge, every data point**

Physician-validated AI reviews 30,000 data points for every patient discharge in seconds

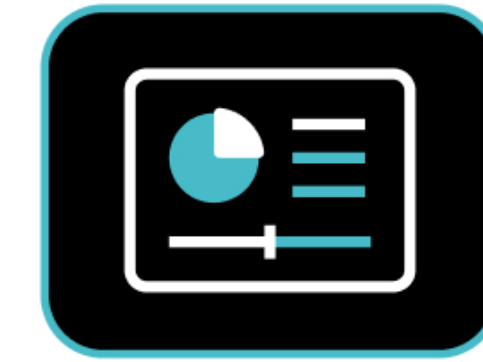

**Simple addition to prebill stage**

Fits within your existing workflow: after coding and CDI but before billing — no DNFB impact

**5:1 ROI guaranteed**

ROI on Day 1: Our results-based pricing means you only pay for approved and billed findings

**Real-time reporting**

Track every cent of new revenue captured, plus break down findings by DRG, physician, and more to improve upstream processes

## The Challenge

Coding technology and CDI best practices typically capture 99% of potential diagnoses, which is remarkable for any process. But that 1% hidden in a sea of data can still cost your hospital millions each year.

SmarterDx uses the 30,000 data points per patient visit to provide a more accurate, more complete diagnosis in seconds, enabling hospitals to be paid accurately for the care delivered.

## How SmarterDx Works

### Ingests the entire record

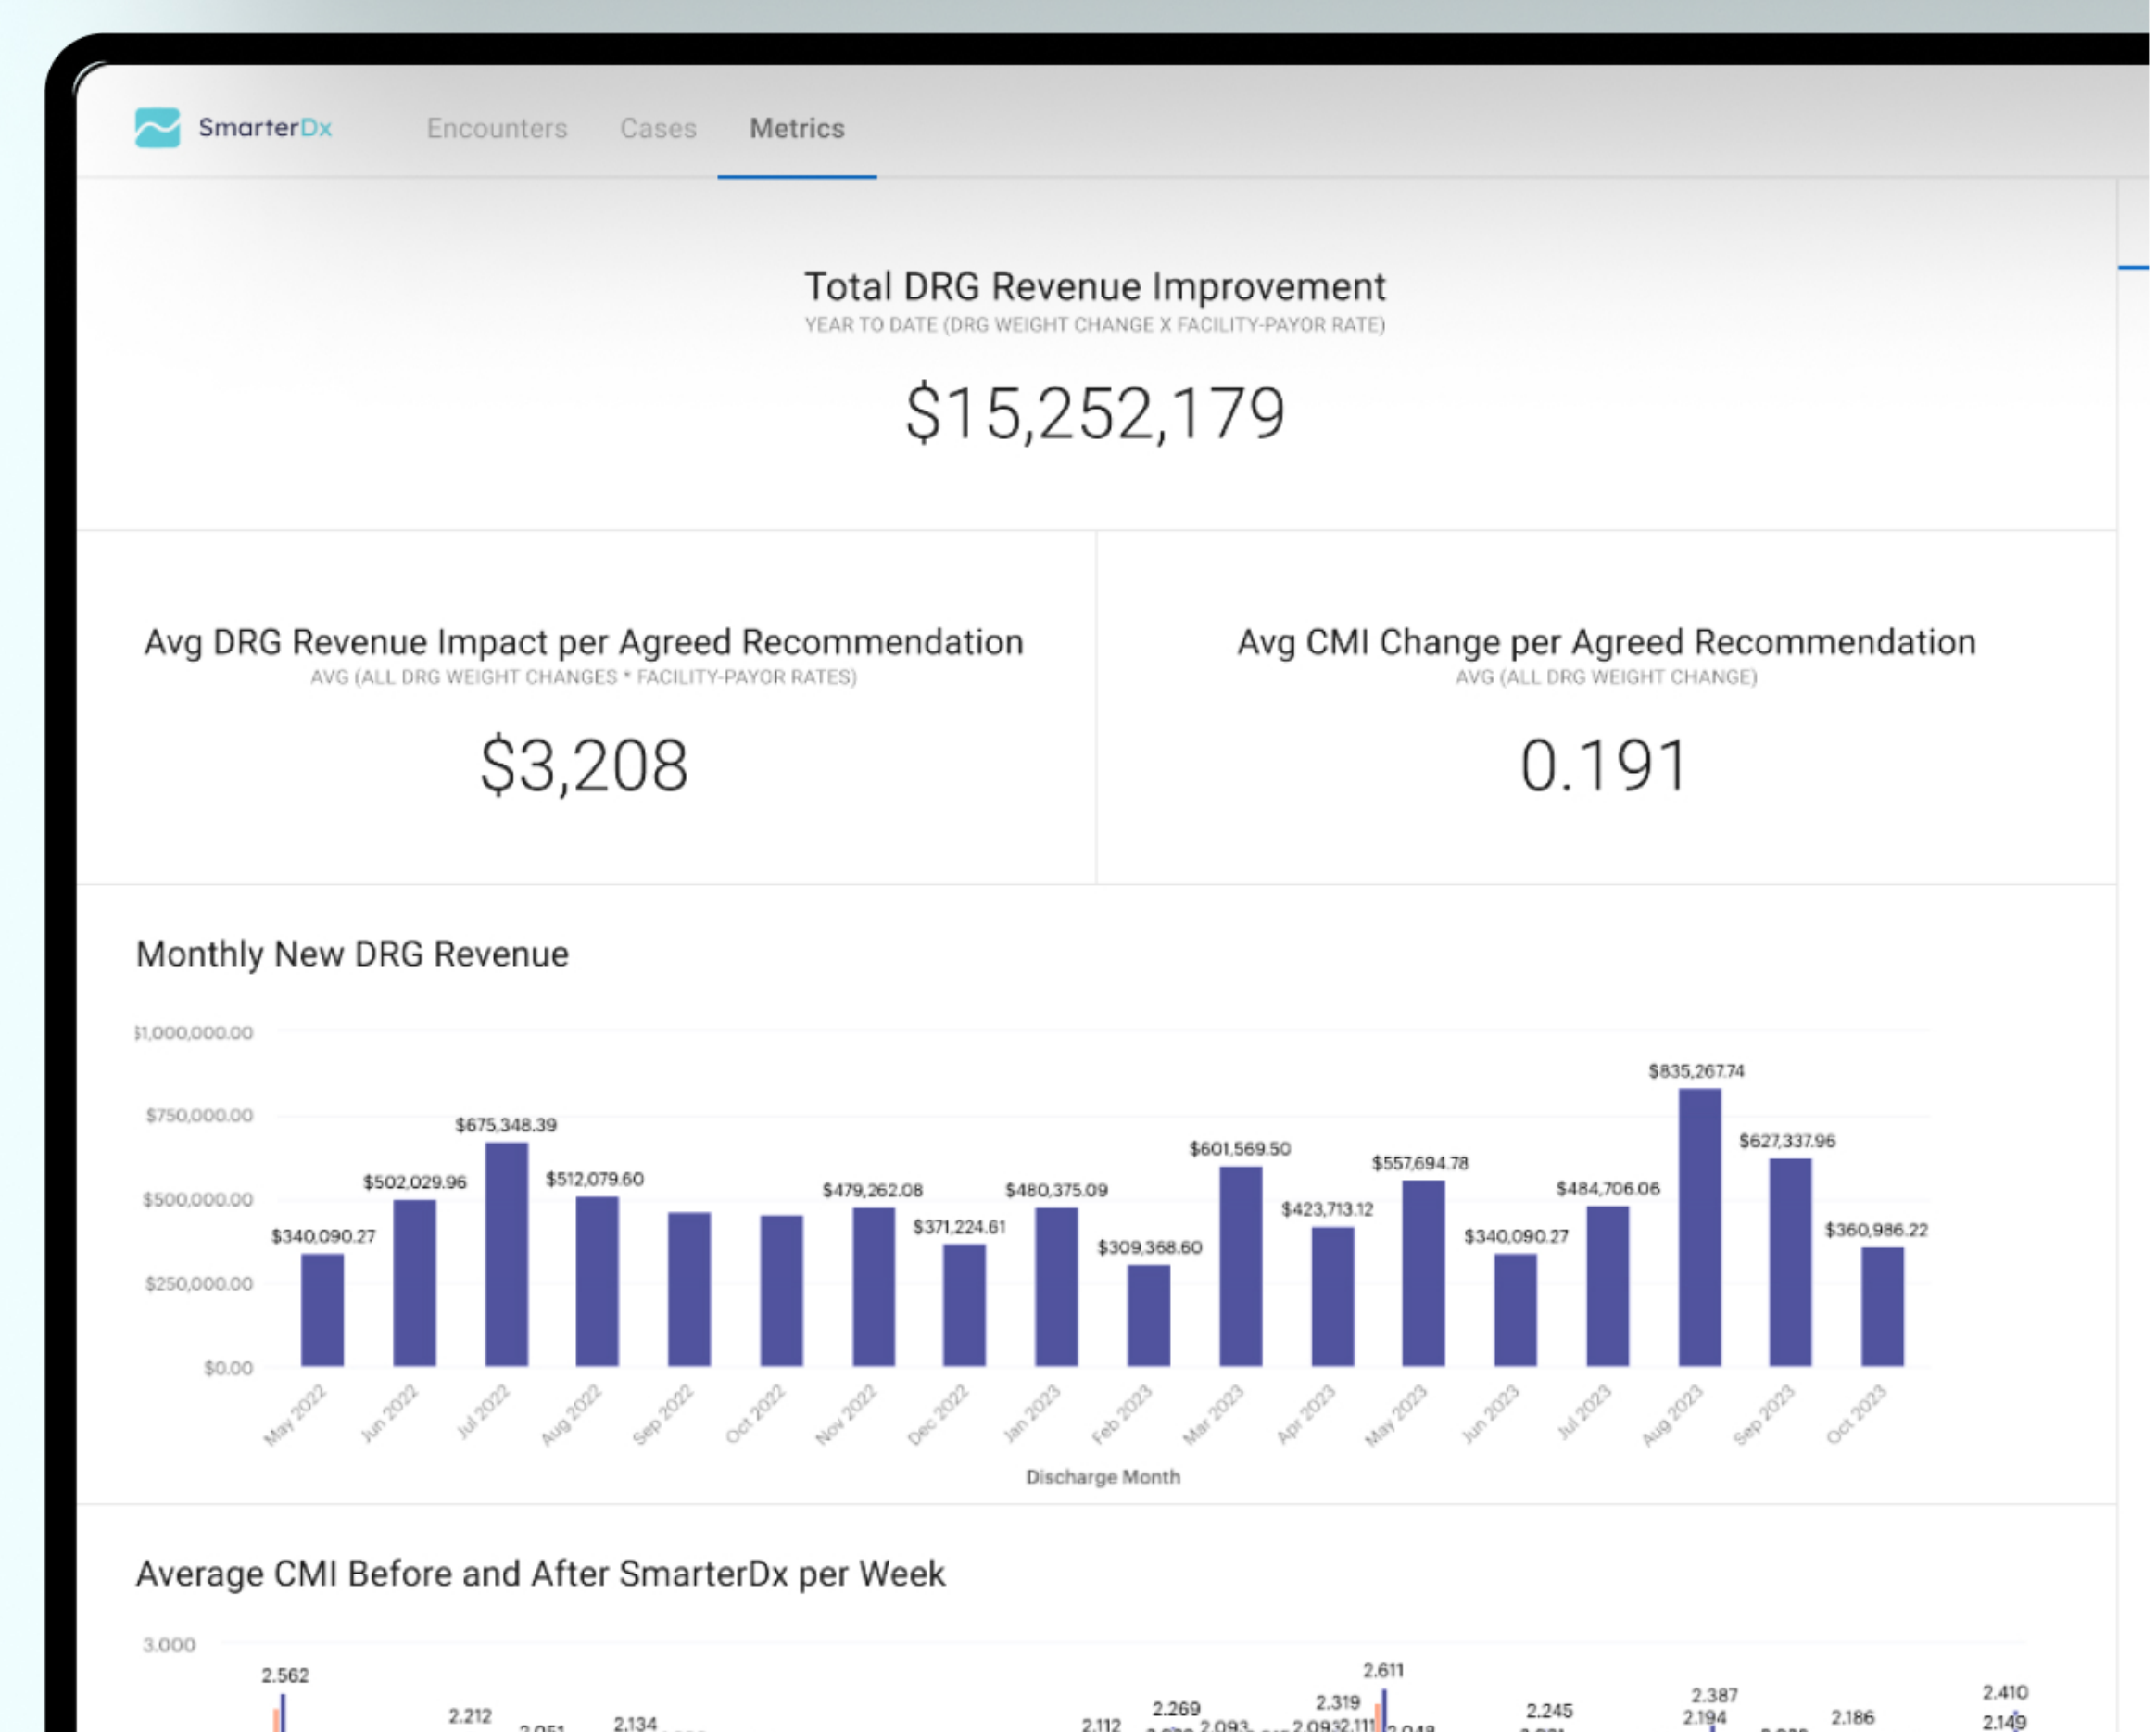

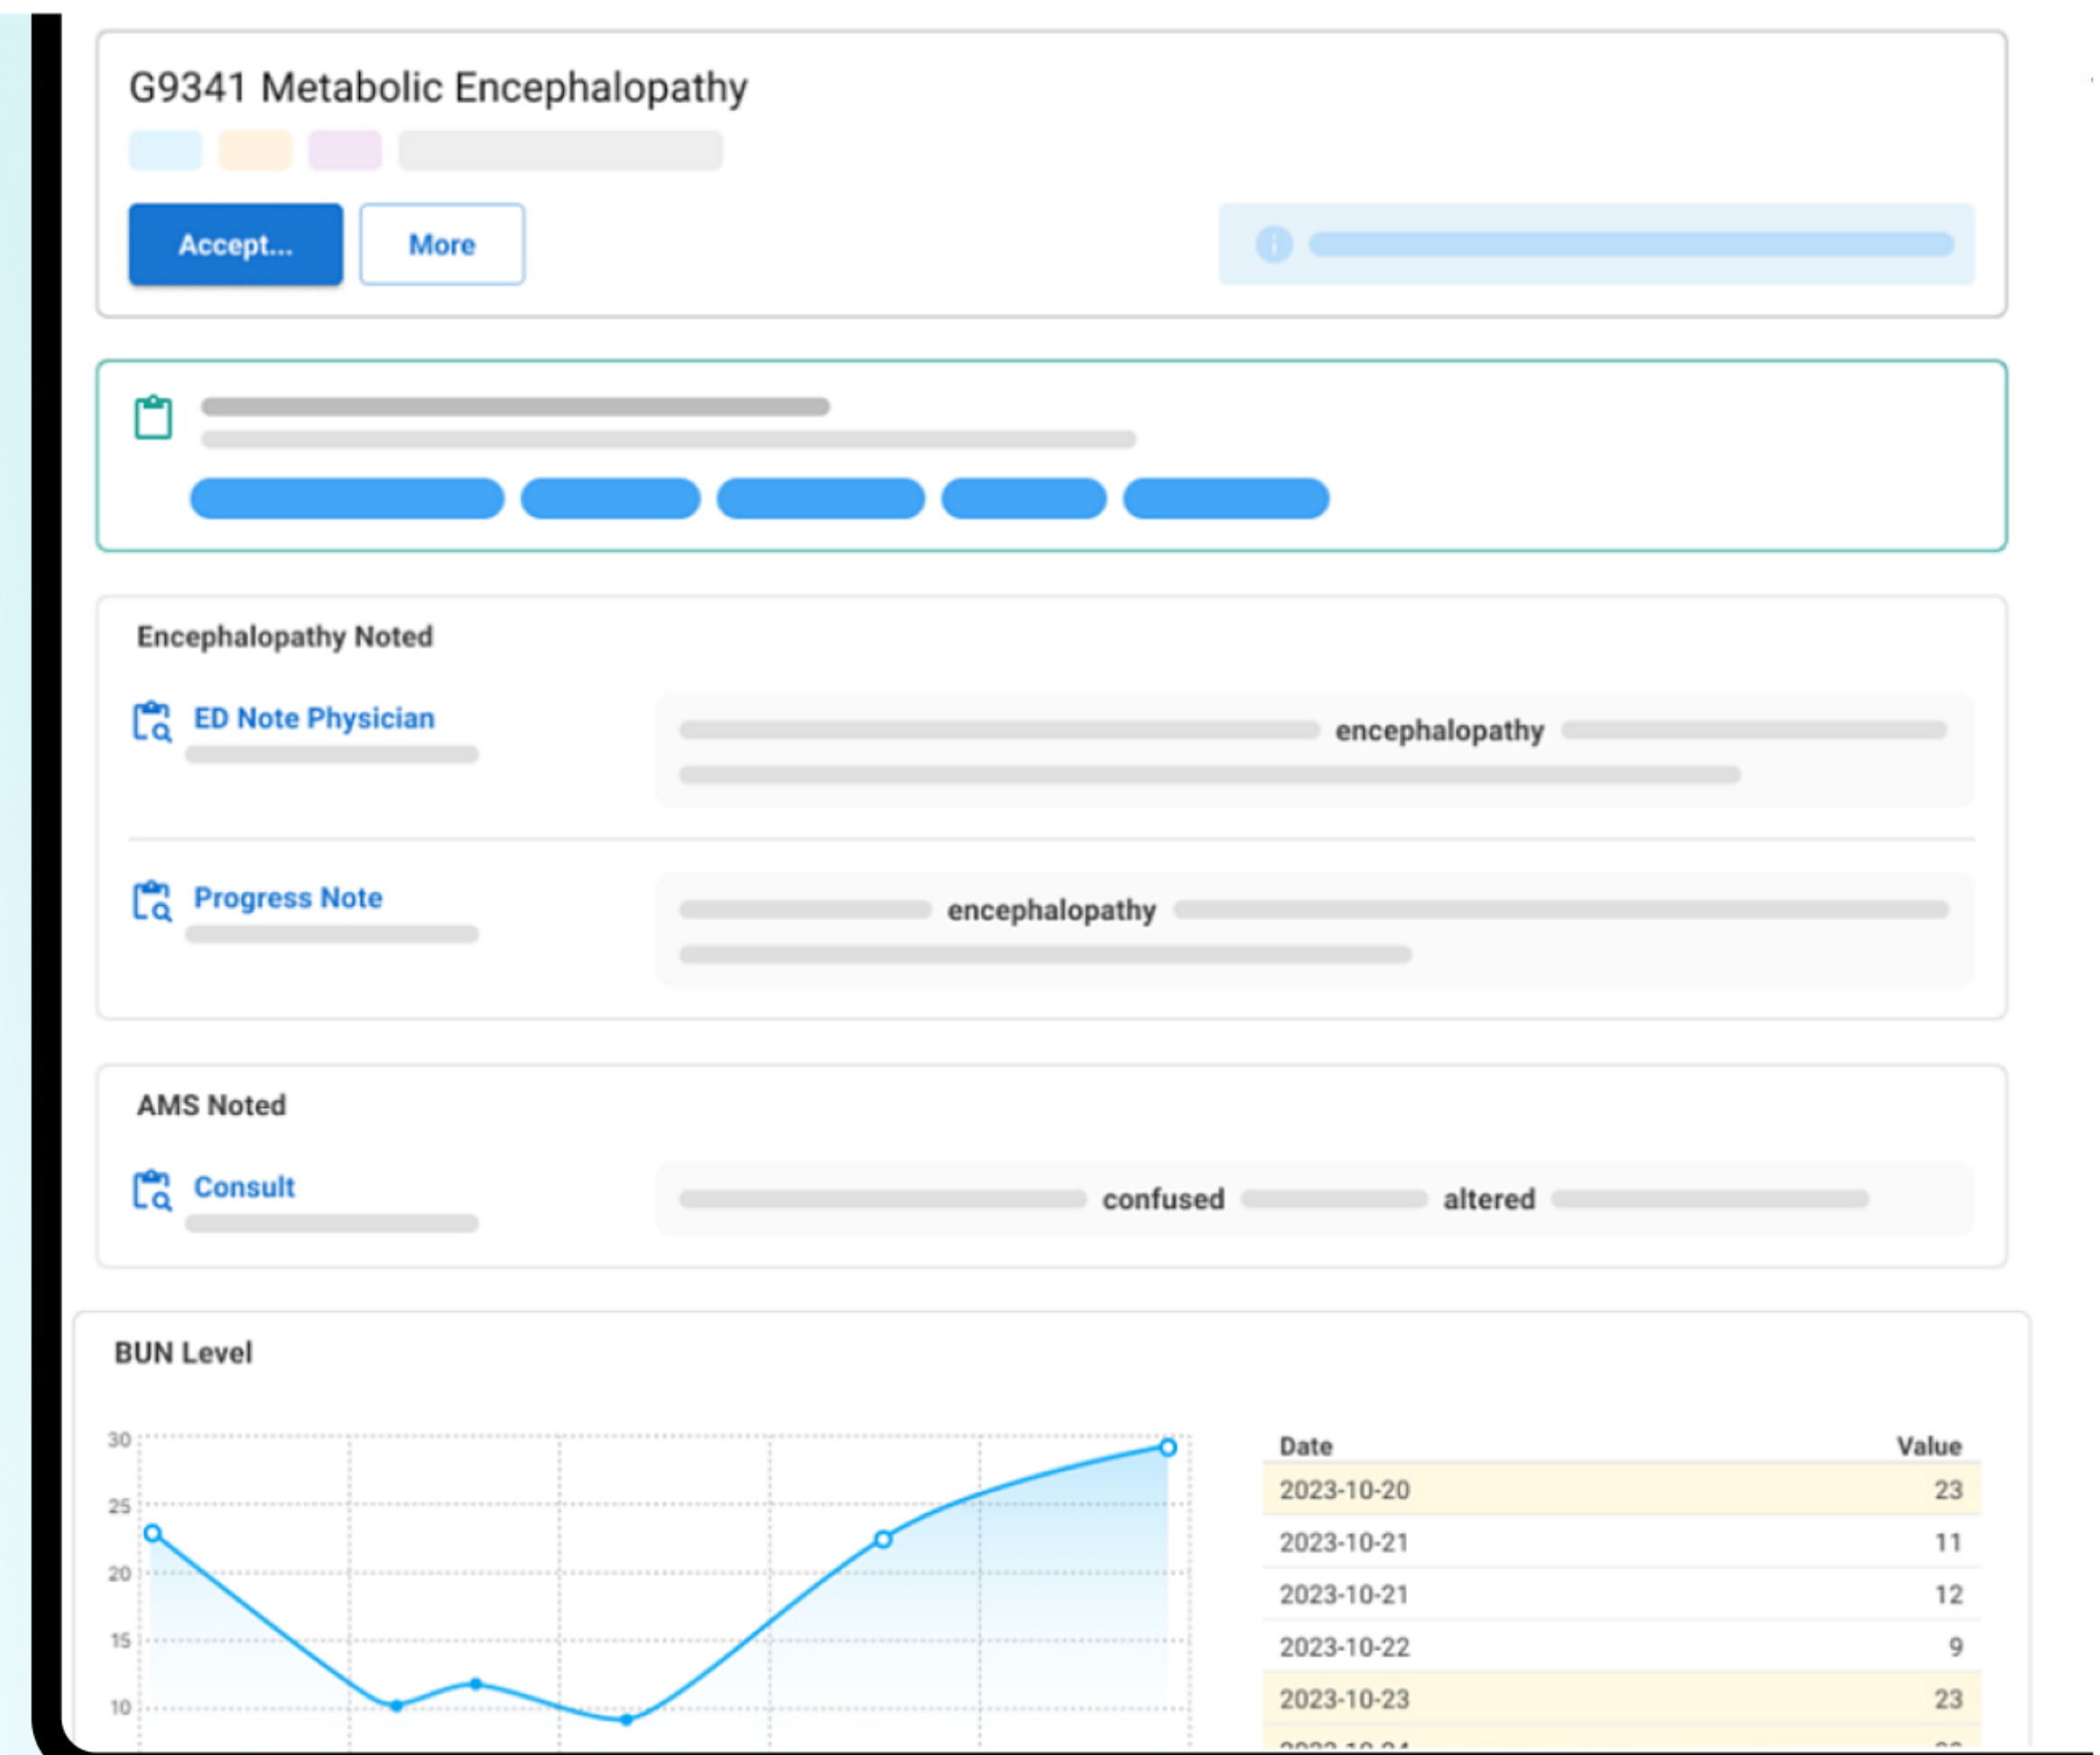

including every note, lab, study, medication, order, vital reading and ICD-10 code for every patient

### Reviews every case with advanced clinical AI

and deploys counterfactual modeling to quickly and accurately identify missed coding opportunities

### Provides supporting evidence

for every recommendation for instant validation by your CDI team

# 5:1 ROI Guaranteed

See how much leading organizations are capturing with SmarterDx.

## Midwest Health System

**\$11M net new annual revenue**

1,652 beds  
70,000 patient discharges

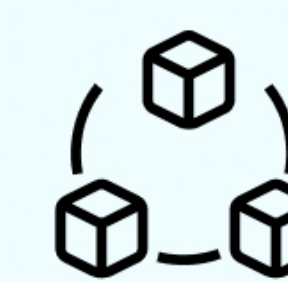

### Tech baseline

Cerner,  
Streamline

### Program baseline

CDI leader: 15+ years  
experience, advisory board,  
ACDIS chapter lead

### Implementation

0 net new FTEs,  
10-week go-live

## Northeast Academic Health System

**\$32M net new annual revenue**

3,301 beds  
125,000 patient discharges

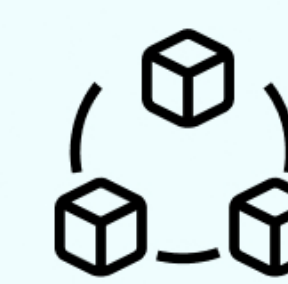

### Tech baseline

Epic, Accuity,  
Cloudmed, PWC  
SMART

### Program baseline

Revenue and quality  
review, 100% coverage

### Implementation

0 net new FTEs,  
8-week go-live

## National Health System

**\$47M net new annual revenue**

21,326 beds  
300,000 patient discharges

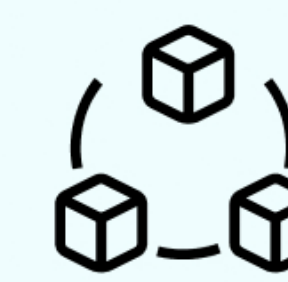

### Tech baseline

Cerner, Nuance,  
Accuity

### Program baseline

CDI leader: 10+ years  
experience, centralized  
CDI and coding

### Implementation

0 net new FTEs,  
11-week go-live

SmarterDx provides a prebill safety net to ensure no opportunities are lost, identifying net new revenue and improving measures of care quality. Large hospitals and health systems across the U.S. are finding an average of \$2M in net new revenue per 10,000 patient discharges.
