Formalize for Success

We help you avoid the pitfalls of incomplete project definition and too loosely defined objectives allowing for a full alignment of solutions with strategic objectives.

One page Scoping

We are used to working based on a 10 line one pager to formalise solutions for customers and ask the questions that will make your project a winner.

Pilot to Scale

Defining Minimum Viable Solution and piloting it in a closed environment can help to get insights into early tweaks required for creation of a scalable solution.

Meplis has **extensive experience in Open Innovation** projects with industry and uses several frameworks and tools to accelerate the formalisation and architecting of a Innovative solution. Reduce time on overdefining and documents by working with Meplis and **shorthen time to launch**. We lay stong emphasis on **visitor drivers, ROI and success KPIs in defining scope.**

When a project is clearly defined, Meplis can set out to realize a **Gap Analysis** to see which parts of the solutions are covered by Meplis technology & Services and which parts require the integration of a third-party solution or even custom development.

From idea to proof of concept, we help you think everything through and **avoid surprises and rework** further down the road.

Meplis aims for long time collaborations and always tries to **make concepts tangible** to allow for better evaluation of suitability and strategic alignment.

CONTACT MEPLIS

Freqently Asked Questions

Is this service performed remotely?

A: Yes, Meplis can perform this service completely remotely in collaborative online work meetings with your team.

Lightning Fast setup

Since Meplis largely depends on its SaaS platform and microservices, setting up a well defined solution can be done in a few days. This will also immediately make the solution tangible and usable in a testable staging environment

Design & Brand Identity

Larger organizations typically have brand identity manuals that are ready to use. Additional interface designing can be added if the defaults don't suffice

Custom & third-party apps

Custom development and third party integrations required for the solutions as defined in project definition & ideation phase are well planned out and can closely be monitored.

Whether you are setting up a proof of concept minimum viable solution or are going straight for a final setup, **we work closely with you to avoid mistakes and misunderstandings.**

Using our standard Meplis SaaS & Services you **reduce time to market and mitigate risks** associated with custom development timelines.

We help customers configure everything; user roles & access rights, build algorithms, questionnaires, surveys, decision support systems, pathways, libraries and upload files. We design and implement content and courses

Meplis sets up social networks, gamification, notifications, alarms, reporting, campaigns tracking, regions, languages, emails and integrations.

Enterprise Management

We manage projects for customers end-to-end. Avoid hiring more headcount and outsource project management and deployment to Meplis' experienced professionals.

Deployment pack

Meplis packages annual services in deployment packs for dynamic content implementations, managed Livestreams, reporting and global affiliate collaboration. This allows for transparency and support budgeting & planning.

Daily Management

Large projects may require considerable management. Meplis works with your management team to stay completely up to date and aligned on progress, requirements and to manage the ROI.

Depending on the engagement solution you are running on Meplis, management & deployment services reqirements can differ greatly. Static continuous medical education project might not require any services after setup if no content is added or everything is self-managed.

Other business objectives can require larger high velocity dynamic content strategies to successfully engage target audiences. Meplis offers all the services you need to keep your project attractive and innovative.

External KOL Livestreams

As part of a deployment pack, Meplis can manage events with parties outside your organization, such as KOLs.

We have extensive experience in collaborating with health professionals in the context of content creation, recoding and Live events.

CONTACT MEPLIS

Tech & End User Support

Meplis has standard SLAs depending on your license type and also offers end user support as a service.

We hire specific staff for your support needs for long term contracts; such as nurses or administrative staff.

Freqently Asked Questions

Can I add services at any time?

A: Yes, but keep in mind that planning services in deployment packs allow us to offer more attractive rates and better service.

Closing the Gap

Any well defined solution might require alterations of or custom development of new features or third-party integrations to be fully effective in creating the expected value. Meplis supports you to close the Gap.

Custom Code

Meplis develops custom code for clients; whether for frontend customization or to add a specific backend functionality.

Integrations

We can integrate with the third party Apps and APIs used by your organization or that are required to complete the projected solution.

Meplis is an open health collaboration platform that offers a significant amount of technology and services for customer engagement and a variety of other use cases. For certain features, we like to rely on global standard third-party solutions to improve usability, facilitate end-user adoption, reduce overall project costs, etc.

CONTACT MEPLIS

Frequently Asked Questions

I have a third-party app and would like to integrate with Meplis 🔼

A: Please contact us to understand what you want to achieve and how it can be mutually beneficial.

Your Dream Team

Work with your favorite inhouse or external agencies and Meplis in tandem. Save resources on procurement & contracting.

Subcontracting

We can subcontract technology and services that are required for your solution to facilitate and speed up collaboration.

Your preferred agencies

We will work closely together with your preferred content or design agencies to reduce time to market and boost operational efficiency

Keep your eagle eye view on the project and avoid having multiple project management dashboards. Meplis will use any management technology from your inhouse or external agency to integrate solution management perspective.

Translations, content creation, design, marketing campaigning, video recording? If you already have a partner, we will help them deliver the best possible services to you

CONTACT MEPLIS

Frequently Asked Questions

Do you help clients identify suitable agencies?

A: Yes, we can help you objectively select an agency for activities on the project outside Meplis code scope
