

# Communicate efficiently with colleagues and patients

Make protecting health information simple with our HIPAA compliant business texting plans for the healthcare industry.

## Designed to keep healthcare data safe

Take advantage of the ease and convenience of business texting—while knowing that your customers' health information is secure. The best part is that your customers don't need to download a separate app.

### Fully HIPAA compliant from beginning to end

We follow all safeguards to ensure that your customers' electronic health information is protected, and so do the companies we work with.

### Secure data storage and encryption

Textline stores consent in HIPAA-compliant cloud environments, and we follow standard encryption protocol to protect your data.

### Automated patient consent made easy

Our platform features built-in automation to obtain, document and store patient consent, which makes the process hassle-free for your team.

☒ Automatic signout

☒ Data encryption

☒ Unlimited data retention

☒ BAA provided

# Do you need HIPAA compliant software?

All healthcare providers—as well as vendors and business partners that have access to their data—need to comply with federal guidelines that protect health information.

Hospitals

Physicians

Clinics

Dentists

Lab technicians

Optometrists

Insurance

Pharmacists

Nursing homes

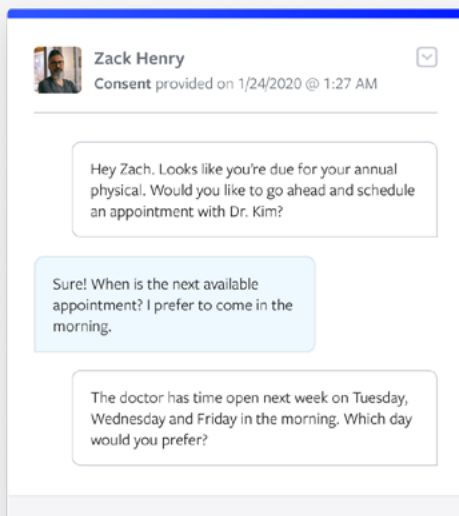

Health care startups

Medicare + Medicaid

Health billing services

## Secure clinical communication for healthcare professionals

### Gain patient consent

All users receive an automated consent message before conversations can start.

### Set appointments

Stop playing phone tag. SMS makes coordinating patient care easy.

### Message with colleagues

Use departments or internal discussion tools to collaborate with coworkers.

### Direct patient communication

Give medical advice in real-time, and safely share important documents.

## Start texting patients now

1

### Set up a Textline account

HIPAA compliance is available for our Standard and Pro plans.

2

### Get a phone number

Sign up for a new number, or text enable your existing one.

3

### Sign a BAA

We'll provide you with a Business Associate Agreement via Hello Sign.

4

### Start conversations

After users accept an automated consent request, you can start texting them!
