Accurate Data. Real-Time Intelligence. Pinpoint Accuracy.

When precision matters.

Staff Duress

Implementing an RTLS system with enhanced safety protocols and nurse call automation helps ensure safety and peace of mind for nurses and staff when it comes to mitigating the risk of personal threats and potential for harm in the care environment.

- A mobile panic button discreetly alerts responders to staff duress incidents.
- Automated alerts communicate who needs help and where, enabling immediate response.
- Available interfaces can extend the reach of alerts to nurse call systems, security systems and mobile devices via middleware.
- Analytics and reporting help staff gauge response efficiency, determine staffing levels, assess security considerations and more.

Asset Tags

Ensure your equipment is where it needs to be when you need it.

- Infrared, Wi-Fi or Bluetooth® Low Energy (BLE) locating signals
- Zero in on the level of precision
 - Room-level or better with IR
 - Near-room with BLE
 - Zone level with Cisco® Wi-Fi.

Automated Monitoring, Visual Messaging and Synchronized Timekeeping

From temperature and humidity to water leaks and closed doors, automated environmental monitoring eliminates manual logging and reporting and ensures accurate data.

Synchronized time keeps everybody and everything on time.

Visual messaging can be implemented anywhere for any audience, from within a unit to enterprise-wide.
