

LABORWATCH

Automated escalation notifications, powered by Vigilance

HUMAN FACTORS THREATENING PATIENT SAFETY

constant distractions

lack of situational awareness

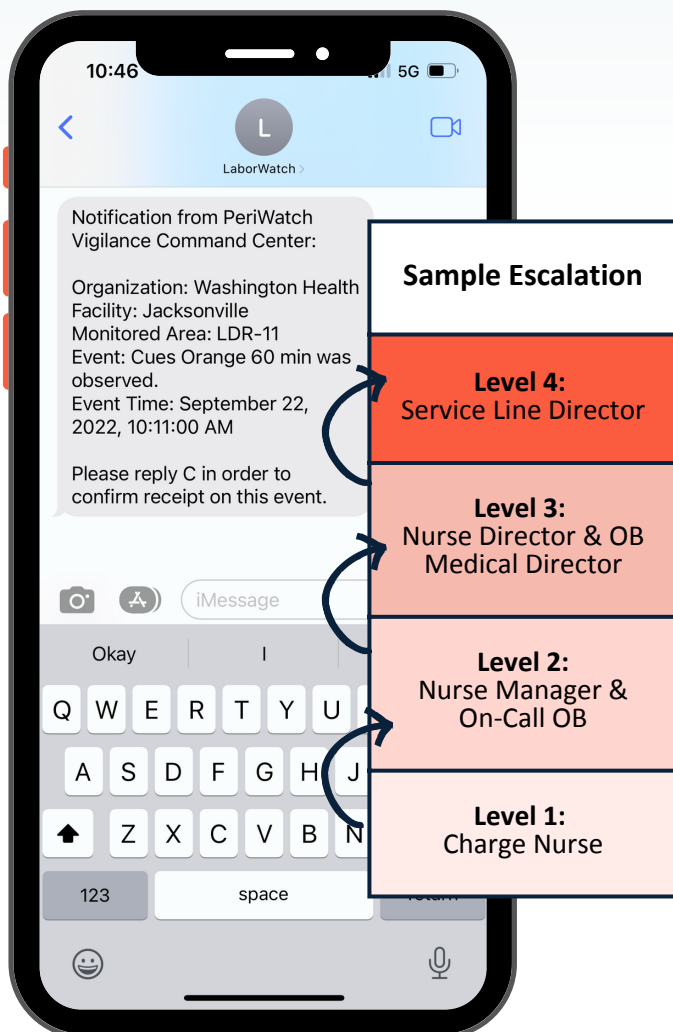

delayed recognition

normalizing deviance

failure to escalate

failure to communicate

When patient safety is threatened, LaborWatch provides designated hospital leaders automated SMS notifications and escalations to promote chain of command communications.

AUTOMATED ESCALATIONS

Escalate persistent deterioration up the chain of command automatically with fully customizable escalation tree.

SMS MESSAGES

Notifications with no user input required. 90% of SMS texts are read within 3 minutes of being received (Tatango, 2020).

OBJECTIVE NOTIFICATIONS

Objective Vigilance notifications when maternal-fetal parameters exceed safety limits set by your organization.
