

Customize the surgical journey for your team.

Equip your employees with concierge-level care, optimized provider matching, and customized action programs.

Over 1 million Americans experience significant complications after surgery. This leads to:

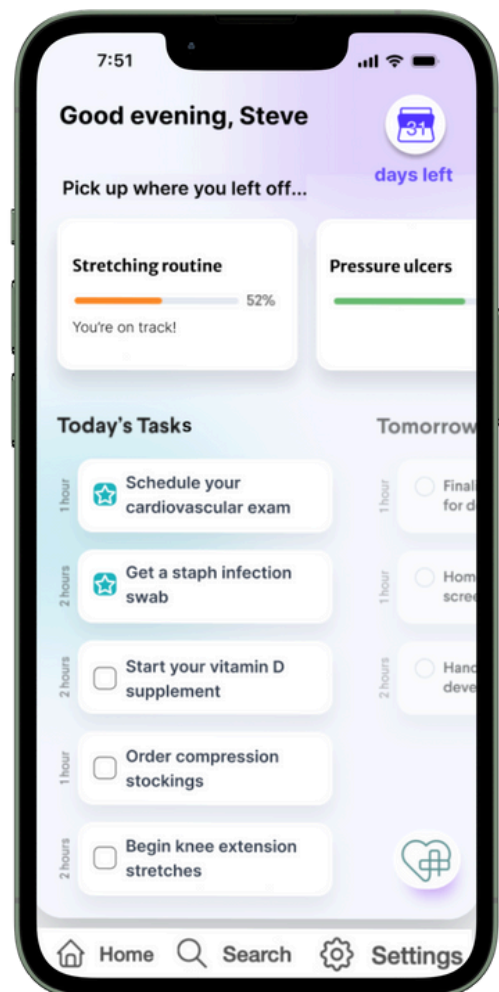

- +78% employee absenteeism
- +114% longer hospital stays
- +\$9k productivity loss / employee
- +\$37k in treatment costs / employee

We help reduce your medical spend by preventing these medical errors.

With our platform, you gain insights from decades of clinical research to improve hospital outcomes for your community. Our full suite includes:

- Risk factor identification
- Hospital choice recommendations
- Precision surgeon-level data
- Customized preparation roadmap
- Educational content & action plan for recovery support

Improved healthcare outcomes & employee happiness.

Surgical costs account for 34% of healthcare spend. We can help.

With End to End Health, your team gets precise, proactive steps to improve surgery recovery and prevent 70% of complications. These steps allow your team to:

- **Shorten length of stay**
- **Prevent readmissions**
- **Reduce healthcare spend**

Here's how it works:

01

Create your profile

After gathering key info on the user's medical history and conditions, we construct a roadmap based on risk factors.

02

Review hospital choices

Match each user with the best-suited hospital for their procedure and medical history to minimize risks.

03

Find your optimal surgeon

Next, connect patients with high-volume, skilled surgeons from the top hospitals to prevent errors.

04

Implement action plan

Equip patients with a personalized care journey that addresses your risk factors with action items.
