# Ambient location intelligence to power what comes next.

Sonitor transforms real-time movement into actionable intelligence, empowering hospitals and clinics to operate smarter, safer, and more efficiently.

sonitor

# Powering What Comes Next

From locating critical assets to protecting staff and enhancing patient flow, Sonitor's platform and technologies deliver the accurate and reliable data required to optimize care delivery.

SonitorONE Infrastructure enables efficient sub-room level accuracy as needed to automate workflows at the bay-level where care is delivered.

SonitorONE Badges and Tags locate assets, protect staff, and optimize patient workflows to ensure efficient care enterprise wide.

# The SonitorONE™ Platform

**High-precision location intelligence for healthcare.**

SonitorONE unifies multiple location technologies, modular software, and a scalable cloud architecture to deliver real-time data that improves safety, efficiency, and workflow automation across the hospital.

### RTLS Infrastructure

- SonitorONE ultraBeacons™
- SonitorONE Gateways
- SonitorONE Basic Beacons

### RTLS Tags

- SonitorONE Bluetooth® Low Energy (LE) Tags
- SonitorONE High Precision Bluetooth LE + Ultrasound Low Energy(TM) (ULE) Hybrid Tags

### Management Console

Configure, control, and monitor the SonitorONE system. Change settings and add devices as needed.

### Integration Layer

Synchronize with enterprise systems such as the EMR, Nurse Call, CMMS, and ERP to enable automations.
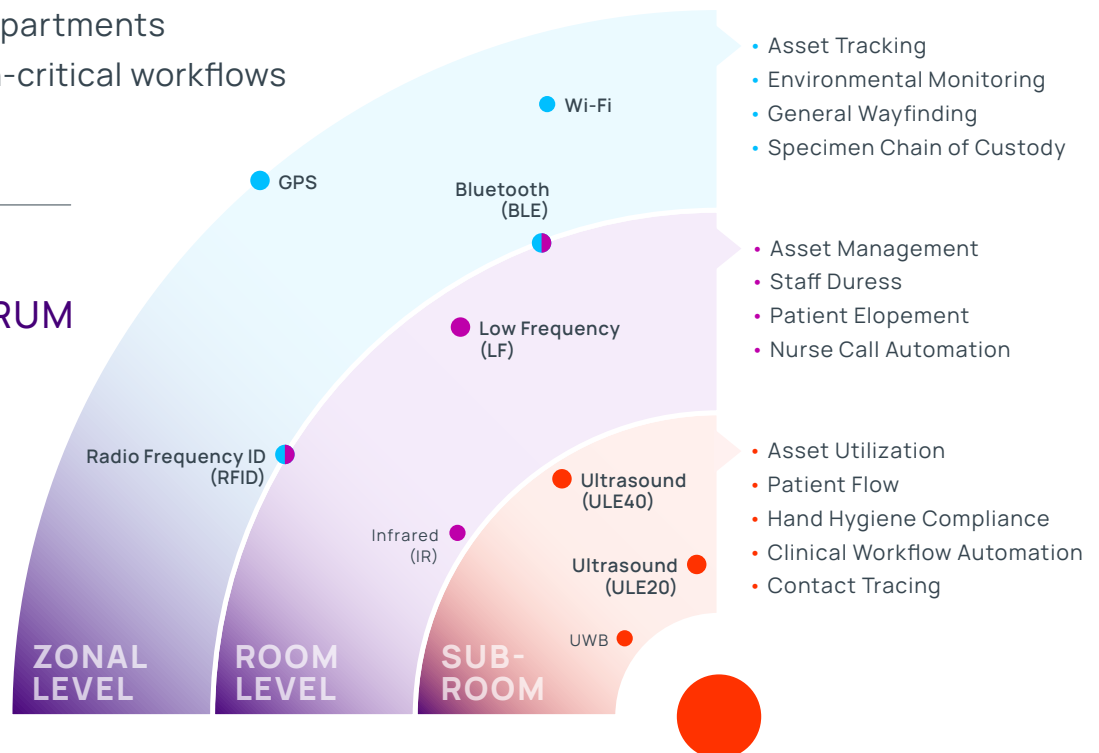

# Purpose-Built for What Healthcare Needs Next

SonitorONE uniquely combines **ULE, BLE, LF, RFID, GPS**, and **mobile phones as tags**, giving hospitals unmatched flexibility.

- Accuracy where it matters
- Scalability across departments
- Reliability for mission-critical workflows

## ACCURACY SPECTRUM

Aligning the right use cases with the right location tracking technology, all in ONE.

Wi-Fi

GPS

Bluetooth (BLE)

Low Frequency (LF)

Radio Frequency ID (RFID)

Infrared (IR)

Ultrasound (ULE40)

Ultrasound (ULE20)

**SUB-ROOM**

- Asset Tracking
- Environmental Monitoring
- General Wayfinding
- Specimen Chain of Custody

- Asset Management
- Staff Duress
- Patient Elopement
- Nurse Call Automation

- Asset Utilization
- Patient Flow
- Hand Hygiene Compliance
- Clinical Workflow Automation
- Contact Tracing

# Software Applications

Workflow automation across the enterprise.

## ONE VIEW
Find staff, assets, and patients

## ONE ASSET
Increase asset utilization

## ONE DURESS
Protect staff everywhere they are

## ONE FLOW
Optimize workflows and patient flow

## ONE HYGIENE
Automate hand hygiene compliance

## ONE ENVIRONMENT
Automate environmental monitoring

## ONE SPECIMEN
Protect specimens with RFID tracking

# Why Hospitals Choose SonitorONE

- Proven accuracy in complex hospital layouts
- Hybrid architecture tailored by use case
- Secure, scalable, cloud-hosted platform
- Patented ULE and industry-leading mobile phone precision
