Enhance efficiency and surgical quality

Each second counts. Your surgical teams need precise, up-to-the-moment info to be efficient and successful.

Ensure optimal efficiency and prioritize patient safety with a smart operating room solution that monitors activity in and around the OR, provides event detection alerts, and captures real-time data.

Artisight Makes It Possible to Optimize Your OR

We deploy our full suite of features via cameras, a speaker, and two-way video in each operating room — all connected via our computer vision and sensor network platform trained for your operating room specifications.

- OR Coordination
- Surgery Viewer
- Asset and Inventory Management

- Event Detection
- Surgical Grading Tools
- Surgical Phase Detection

artisight.com

Surgery Viewer

Capture videos of surgeries while ensuring HIPAA compliance. This feature removes PHI and converts videos into educational tools for your surgical teams, residents, and interns.

- Video Capture
- Procedure Sharing
- Digital Annotation
- Video Trimming

- Archive and Download
- PHI Removal
- Direct Download
- Variable Playback Speed

OR Coordination

Powered by Computer Vision: Artisight automatically collects OR data in real time and feeds it to your EHR to measure utilization and ensure seamless, consistent documentation.

Track the movement of beds and surgical drapes in and around the OR to identify trends and gain insights into the effectiveness of your OR workflows and standards.

- Drape Monitoring
- Bed Rollout Time Stamps

Ultra-wideband Tracking: Get unparalleled precision in and around your OR with technology that enables Indoor Positioning & Real-Time Location Systems (RTLS).
