AI Agent: **Hayan**

Meet Hayan, the intelligent agent built into KAISPECare to support patients, providers, staff, and administrators

Hayan Can Help With:

- Appointment scheduling assistance
- Automated reminders & confirmations
- Common patient questions
- Medical research support for doctors and staff
- Front desk workflow support
- Billing guidance prompts
- Staff productivity tasks
- Faster communication across teams

Built on Trusted Microsoft **Technology**

Secure, scalable, and governed foundation for healthcare operations

Why **KAISPECare**

Purpose-Built for Smaller US Practices

Designed to go-live in under 4 weeks for Clinics with 1-10 providers – no IT team or lengthy implementation required.

Structured Clinical Records for Informed Decisions

Providers access a patient's full visit history, medications, allergies, and active conditions in a single screen – reducing time spent on chart prep before each encounter.

Faster Time to Value

Front desk staff are trained and handling real appointments within one day – with Hayan handling routine scheduling and reminders from day one, so your team focuses on patients, not administration.

Common Challenges We Help **Solve**

- Manual scheduling and front desk overload
- High no-show rates
- Fragmented patient records
- Delayed billing and collections
- Poor coordination between staff and providers
- Limited patient self-service options

Let's Build Better Outpatient Care **Together**

KAISPE helps modern clinics deliver smoother patient experiences while improving efficiency and collections
