

RevUp Remote Patient Monitoring Implementation & Workflow

Practice

Identify patients and create task to enroll

Support escalations and care coordination needs based on tasks sent to EHR

Review documentation and submit claims.

MDR Team

Provision RevUp Care Hub device and ship to patient.

Device arrives in 3-5 business days ready out of the box.

Create care plan and provide device education.

Establish patient goals and engagement plan.
Set up RevUp access.

Engage patient to provide ongoing measurements through device and application.

Customized health content and patient reminders.

Monitor patient measures and alerts.

Communicate with patient through RevUp or by phone.

Escalate based on protocols

Document care delivery, measures and tasks to provider.

Generate claims or billing reports for eligible patient services.
