

Why RPM?

Benefits of RPM

Decreases ER visits and hospitalizations by up to **70%**

Can save **\$6 Billion** in annual U.S. Healthcare costs

Improves patient compliance by up to **49%**

Improves overall patient outcomes by up to **44%**

What is RPM?

RPM (Remote Physiological Monitoring) in long-term healthcare:

- enhances monitoring
- supports preventive care which reduces hospitalizations
- optimizes costs
- engages patients
- improves medication management
- enables data-driven decisions
- integrates with Telehealth for virtual and in-person visits

Unlock New Revenue Potential with Updated CMS Codes:

RPM

99453

- Initial setup and patient education on use of equipment
- National non-facility rate \$19.03

99454

- Monthly monitoring, and have minimum of 16 days
- National non-facility rate \$55.72

99457

- Monitoring and treatment management with patient/caregivers
- Minimum of 20 minutes in a calendar month
- National non-facility rate \$50.18

99458

- Monthly monitoring, and have minimum of 16 days
- National non-facility rate \$40.84

99091

- At least 30 minutes every 30 days of gathering, monitoring
- Interactive patient communication is not required
- National non-facility rate \$56.41

CCM

99490

- At least 20 minutes of clinical staff time directed by a physician or other qualified health care professional, per calendar month
- National non-facility rate \$64.03

99439

- Subsequent 20 minutes
- Clinical staff (may be billed up to 2x/month)
- National non-facility rate \$48.45

99491

- At least 30 minutes provided personally by a physician or other qualified health care professional per calendar month
- National non-facility rate \$86.18

99437

- Subsequent 30 minutes
- Physician or other non-physician practioner
- National non-facility rate \$61.26

Advanced Sensor Technology

The XK300 Sensor leverages cutting-edge sensor technology to capture vital patient data accurately and efficiently.

Comprehensive Monitoring

From vital signs to activity levels, the XK300 Sensor provides comprehensive monitoring capabilities to track patient health continuously.

Seamless Integration

Integrated seamlessly with Omnivers' software platform, the XK300 Sensor ensures real-time data transmission for proactive patient care.

Accuracy: 98%

Real-Time Data: 98%

Integration: 95%

Connected Vital Cart

Vital Cart (Microlife)

One-time Purchase \$2,7000

Real-Time Data Access

Experience precise and reliable vital signs monitoring. Gain instant access to vital sign measurements, ensuring timely interventions and proactive patient management.

Streamlined Workflow

Enhance efficiency in patient care with seamless integration into the Omnivers software platform, reducing manual data entry and saving valuable time.

Enhanced Patient Safety

Monitor patients more effectively and detect abnormalities early, promoting better health outcomes and patient safety

Accuracy: 98%

Real-Time Data: 100%
