

See the Patient, Trust the Technology

Increases clinician
productivity by
up to 20%

Increases clinician
work-life satisfaction
by 40%

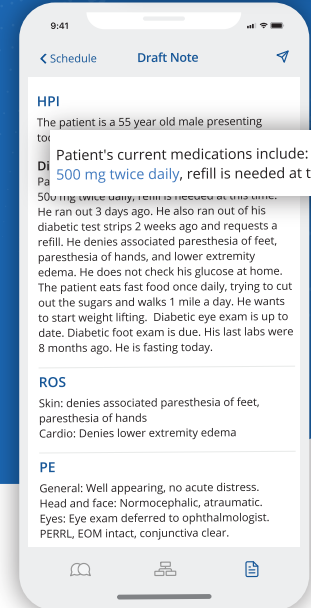

Saves clinicians
up to 3 hours
per day

Doctor

That's great. In addition to the insulin, let's continue the metformin at 500 mg, twice a day. Do you need a refill?

Patient

Thanks for asking, I just ran out 3 days ago. Yes please.

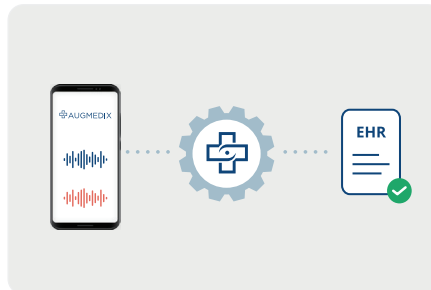

How Our Technology Works

Augmedix provides industry-leading, AI-powered medical documentation technology with ambient clinical intelligence to hospitals, healthcare systems, and physician practices.

Augmedix uses speech-to-text (STT) to capture and transcribe natural clinician-patient conversations.

The Augmedix platform uses natural language processing (NLP), large language models (LLMs), and structured data sets to create a comprehensive medical note.

The structured notes are transferred to the EHR, and the clinician simply signs off.

"This partnership and investment is part of our broader strategy to use technology to support our physicians and nurses and enhance patient care."

Michael J. Schlosser
MD, MBA, FAANS, SVP Care Transformation
and Innovation (CT&I), HCA Healthcare

We prioritize:

- Innovation
- Transparency
- The responsible use of AI
- Compatibility with EHR systems

So you can achieve:

- Immediate and significant ROI
- Improved note accuracy
- Reduced clinician burnout and turnover
- Optimized patient care

"Overall I'm happy with Augmedix. It helps with my efficiency and my charts are closed faster. It really allows me to spend more time connecting with the patient."

Dr. Susan Adham
Pediatrics, Sutter SEBMF
