

AI Medical Scribe

Overview

The AI Medical Scribe listens to doctor and patient conversations and creates clinical notes in real time. It works inside the EHR and reduces manual typing.

Key Features

- Real-time speech-to-text
- Automatic SOAP note generation
- EHR integration
- Structured documentation

Benefits

- Saves time
- Reduces burnout
- Improves accuracy
- More patient focus

How It Works

1. Captures conversation
2. Converts speech to text
3. Generates notes
4. Sends to EHR

Use Cases

Clinics, hospitals, physicians, telehealth
