

GetWell Rounds+

Digital rounding and surveying solution

Delivered on leading-edge SaaS infrastructure, Rounds+ unlocks real-time information capture and provides actionable insight, enabling a better experience for patients, care teams, and employees.

Clinical and non-clinical teams use Rounds+ to monitor patient experience, employee engagement, and quality, safety, and regulatory measures, impacting HCAHPS scores, employee retention, and clinical outcomes, respectively.

Gain valuable real-time insights

In addition to embedded reporting functionality within Rounds+, teams get real-time insight into the patient experience with intuitive dashboards that visualize rounding progress and trends.

Quickly identify opportunities for service recovery

Using Rounds+, teams can initiate alerts, alert reminders, and alert escalations to the appropriate teams to address opportunities for real-time service recovery.

Extend care team reach

Rounding surveys on web browser or mobile app enable teams to reach patients and employees anytime and anywhere, and surveys-by-text to multiple patients/employees at one time makes reach and engagement even easier.

Rounds+ has enhanced attention to immediate customer concerns. We easily adapted it into our workflow to meet the needs of our families quickly. Alerts go to Supervisors and they respond in real time by offering personal visits to the customer.

Sonia Francis, Manager, Environmental Services, Children's Healthcare of Atlanta

- Outpatient Clinic Rounding

Enable self-service rounding with GetWell Inpatient alongside Rounds+

By deploying GetWell Inpatient alongside Rounds+, the requests that patients or family members make through GetWell Inpatient are instantly routed to Rounds+ for quick action and resolution, promoting care team efficiency and further boosting patient satisfaction.

Proactive Leadership Attention to Outcomes (PLATO) rounding: We've seen a huge reduction in, not only our fall rate, but our fall with injury rate, on the units where we've implemented this type of rounding.

Sarah Stanley, Nursing Outcome Team Leader
Sinai Hospital (Lifebridge Health)
