

Patient intake and data collection module

Infermedica Intake is a ready-to-use solution for health care providers, health systems, and telemedicine companies. Use it to improve patient-physician communication with hassle-free intake and simplified data transfer right to the doctor’s desk.

How can Intake optimize your visit flow?

Patient accesses a pre-visit survey

Data is transferred to physician

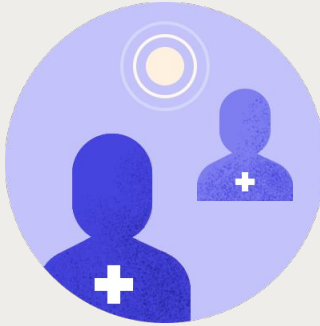

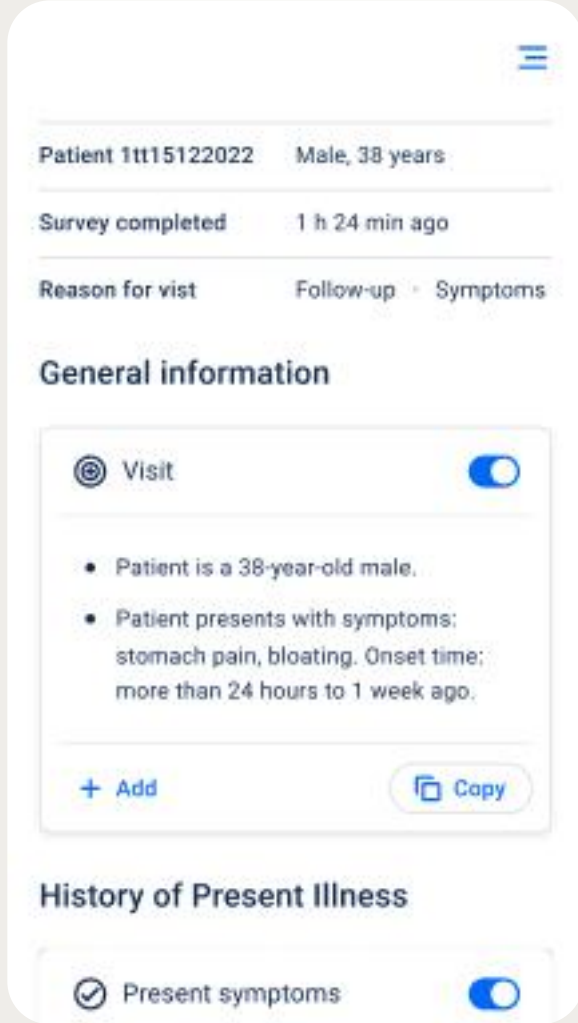

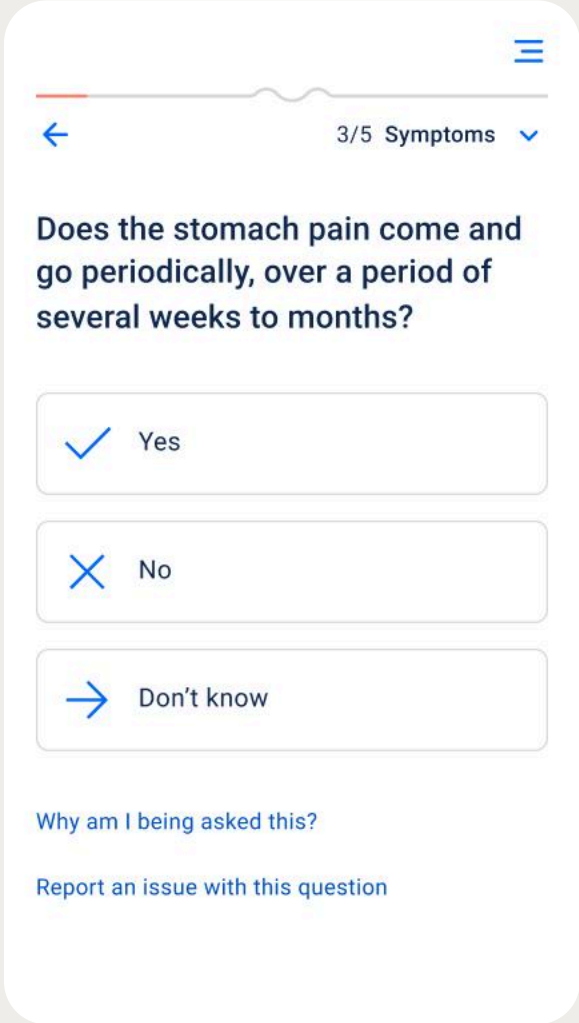

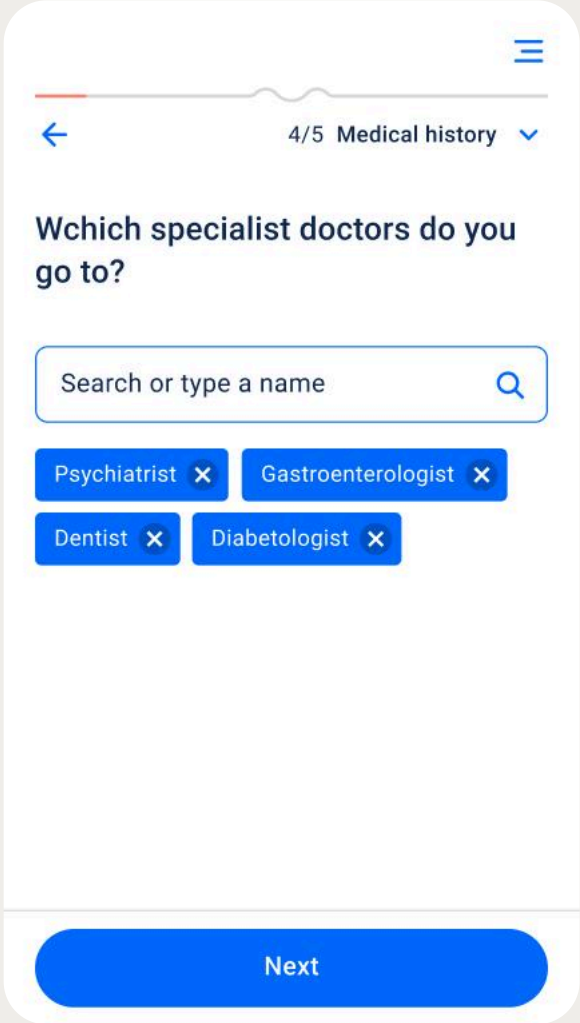

Patient books a visit

Patient undergoes dynamic symptom collection and AI-driven health analysis

Background information (medical history, medications, allergies, etc) is collected

Data is summarized for physicians in an easy-to-use format

Visit flow is optimized

Module marked as class I medical device
