

Mosaic Life Care takes **strategic approach** to rapid EHR archiving

Mosaic Life Care, a healthcare system with four hospitals and more than 60 clinics in Northwest Missouri, was facing a significant challenge. Transitioning from their legacy Cerner EHR system to Epic, Mosaic was up against a critical deadline to archive the Cerner system before their support contract expired. Missing this deadline would result in millions of dollars in additional costs. Typically, EHR archiving projects can take 12 to 18 months, but Mosaic had only seven months to complete the transition.

“At the beginning of the relationship, it was about the timeline and beating that timeline to avoid a significant financial impact to our organization. But that carried through the whole project. Each and every time we faced a challenge, MediQuant came to the table with creative solutions, ultimately building a level of trust that’s rare in vendor relationships.”

Tanya Arthur,
CIO of Mosaic Life Care

MOSAIC LIFE CARE'S COMMITMENT TO EXCELLENCE

Mosaic Life Care serves a diverse patient population across multiple locations in Northwest Missouri, offering a wide range of services, including primary care, specialty care, long-term acute care, home health, and hospice. The healthcare system's commitment to providing exceptional patient care and maintaining efficient operations is evident in its strategic approach to IT challenges.

SOLUTION

A Single, Strategic Archiving Partner

To meet this ambitious timeline, Mosaic Life Care turned to MediQuant, a leader in healthcare data archiving solutions. With MediQuant's extensive experience in handling Cerner products, Mosaic was confident that they could achieve the necessary results within the tight timeframe. MediQuant offered a comprehensive approach to archiving, allowing Mosaic to retire their Cerner system efficiently and integrate the archived data in DataArk® into their new Epic system. "At MediQuant, we have more experience archiving Cerner products than anyone else in the industry, and Mosaic's Cerner Millennium system was a perfect fit for our expertise. The environment at Mosaic was complex, and highly customized, but having successfully completed hundreds of Cerner archiving projects, we were able to hit the ground running the moment the contract was signed," said Niel Veirup, Regional Vice President, MediQuant.

IMPLEMENTATION

Meeting an Aggressive Timeline

From the outset, MediQuant recognized the urgency of Mosaic's situation. The project required not only rapid execution but also close collaboration between both organizations. MediQuant deployed a dedicated team, including project managers, data modelers, and technical resources, to work closely with Mosaic's leadership, including CIO Tanya Arthur. This collaboration was intense, with frequent meetings at both the project team and executive levels to ensure alignment and address challenges as they arose. "At the beginning of the relationship, it was about the timeline and beating that timeline to avoid a significant financial impact to our organization. But that carried through the whole project. Each time we faced a challenge, MediQuant came to the table with creative solutions, ultimately building a level of trust that's rare in vendor relationships," said Arthur.

RESULTS

Significant Cost Savings and Seamless Data Access

**Rapid Completion:**

MediQuant successfully completed the EHR archiving project in just seven months, well within the critical deadline.

**Cost Avoidance:**

By meeting the deadline, Mosaic Life Care avoided millions of dollars in additional costs associated with renewing their Cerner support contract.

**Enhanced Data Access:**

The archived data in DataArk® was seamlessly integrated into Mosaic's new Epic system, allowing physicians and clinical staff to access both current and historical patient records from a single platform, enhancing efficiency and patient care.

**High Stakeholder Satisfaction:**

The project was deemed highly successful by all stakeholders, including the clinical, financial, legal, and compliance teams, who now have single sign-on access to archived data in DataArk®.

FUTURE PLANS

Continued Partnership and Application Rationalization

Mosaic Life Care plans to continue its partnership with MediQuant, leveraging their expertise for ongoing application rationalization and additional archiving needs. This long-term collaboration is expected to play a vital role in Mosaic's digital transformation efforts, ensuring that the healthcare system remains efficient, secure, and focused on delivering excellent patient care.

ADVICE FOR OTHERS:

Strategic Long-Term Data Management

Looking back on the success of their archiving project, Tanya Arthur offers advice for other healthcare organizations facing similar challenges:

**Think Strategically:**

Choose a vendor that offers functionality for your needs today and tomorrow.

**Ensure Seamless Data Access:**

Consider the user experience in accessing archived data, ensuring that it integrates well with your current systems.

**Perform Due Diligence:**

Conduct a thorough cost/benefit analysis, comparing the costs of maintaining legacy systems against the benefits that an efficient archiving solution can bring.
