

Sickbay Telemetry

Sickbay
by Medical Informatics Corp.

Centralize Your Data in a Single Streamlined View

Clinical & Optimization Enhancements

- Rounding
- Time to treat
- Event documentation
- Quality documentation
- Shift reporting
- Workflow analytics

Telemetry Specific Features

Alert Queue

- Tele Alarms
- New Admission
- Shift Change
- Rhythm Validation

Patient Label (Persist)

- Arrhythmia
- Event

Patient Status (on/off)

- Shower
- Prescription
- Away
- Confused
- Rejected

Why Sickbay Telemetry?

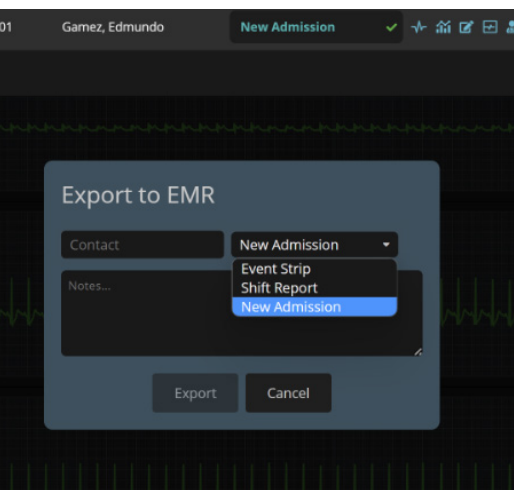

- View up to 80 telemetry patients on one screen at a 1:80 monitoring ratio, across your enterprise
- Single click to see selected patient details
- Share UI from bedside to command center
- Avoid spend on redisplay monitors & central stations
- Centralize, automate, & retain patient event history indefinitely
- Track & identify workflow improvements

Sickbay Telemetry Supported Workflows

Strip Export

Multiple Workflow Options

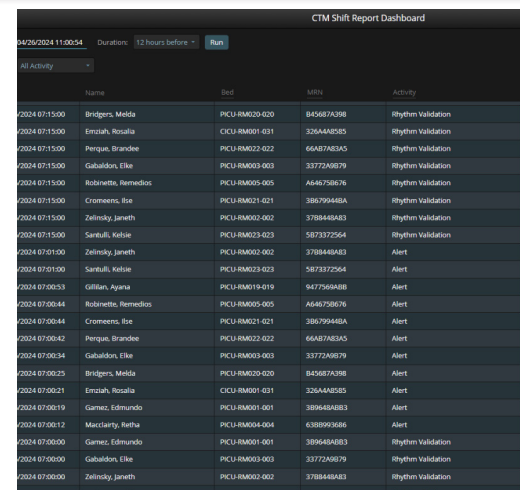

Integrated with EHR for digital strip export
Quickly share strips via URL
Upload strip data to CSV files

Waveform Annotator

Rapid ECG Annotation

Measure waveforms, segments & intervals
Automatic ECG waveform detection algorithm
Interactive markers for manual adjustments
Rhythm selection / feature presets
Save / edit / delete annotations
Send annotated strips directly to EHR

Shift Report

Chronological Tele Event Report

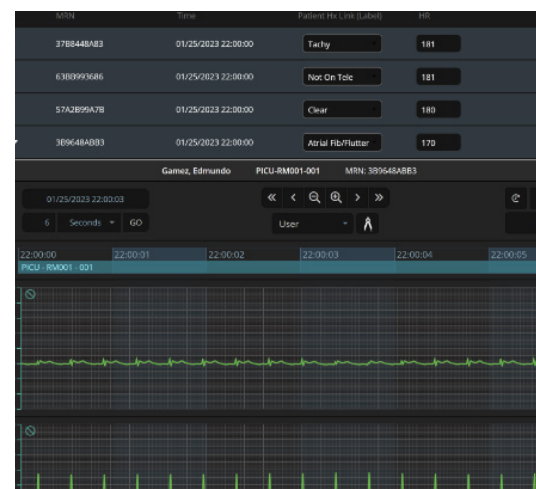

Tele alarms / alerts
Administered medications
Alert acknowledgements
Patient Hx exports
Tele label changes
Tele status changes
Rhythm validation

24-hr Waveform Reviewer

Long-Form ECG Review

24 hours of ECG Data
Gain change (1x, 2x, 4x)
Alarm overlays
Chronological alarm list
Jump to alarm time
Alarm filtering (Name / Severity)
Open strip in Hx / Annotator

Rhythm Validation

Scheduled & Event Capture

Tele Rhythm label / HR Snapshots
Repetition on set interval
View Hx at timestamp
User override of Label / HR
