

# Bright.md's Treatable Diagnoses

The full list of more than 130 conditions treated through evidence-based asynchronous care.

With asynchronous telehealth solution Bright.md, users are guided through dynamically-changing interviews powered by proprietary clinical content for all conditions we treat, which make up more than 50 percent of all primary and urgent care visits. Our content includes more than 130 diagnoses, is evidence-based, and is updated regularly with the latest clinical guidelines.

Through our clinical content, physicians are recommended diagnoses for any specific condition or set of symptoms, as well as treatment options that include both over-the-counter (OTC) and prescription medications, specialist referrals, and digital therapeutics.

Here's the full list of 130 treatable diagnoses Bright.md's asynchronous care solution covers.

## ACNE

- Mild comedonal acne
- Mild mixed acne
- Moderate to severe mixed acne
- Nodulocystic acne
- Rosacea

## BEHAVIORAL HEALTH

- Mild depression
- Major depressive disorder, single, mild
- Major depressive disorder, single, moderate
- Major depressive disorder, single, severe
- Major depressive disorder, recurrent, mild
- Major depressive disorder, recurrent, moderate
- Major depressive disorder, recurrent, severe
- Generalized anxiety disorder
- Screening exam  
(for other mental health and behavioral disorder)
- Adjustment disorder, unspecified  
(Reaction to severe stress)
- Mixed anxiety and depression

## BIRTH CONTROL

- Initial prescription of contraceptive pills
- Refill of contraceptive pills
- Initial prescription of contraceptive patch
- Refill of contraceptive patch
- Initial prescription of contraceptive vaginal ring
- Refill of contraceptive vaginal ring
- Initial prescription of injectable contraceptive
- Refill of contraceptive injection
- Emergency contraception

## BLADDER

- Uncomplicated acute UTI
- Noninfectious dysuria

## BURN

- Superficial burn
- Superficial partial-thickness burn
- Sunburn

## CONSTIPATION

Constipation

## EAR CONCERNS

Otitis media  
Otitis media with rupture of eardrum  
Otitis externa  
Barotrauma  
Impacted cerumen  
Eustachian tube dysfunction  
Otalgia, unspecified ear  
TMJ

## ERECTILE DYSFUNCTION

Erectile dysfunction

## EYE CONCERNS

Allergic conjunctivitis  
Bacterial conjunctivitis  
Viral conjunctivitis  
Stye  
Chalazion  
Blepharitis  
Subconjunctival hemorrhage  
Xanthelasma  
Dry eye syndrome  
Pterygium  
Pinguecula

## FLU EXPOSURE

Exposure to viral influenza

## GERD

Prolonged GERD  
Recurrent GERD  
Refractory GERD  
Dyspepsia

## HAIR LOSS

Alopecia areata  
Tinea capitis  
Telogen effluvium  
Female pattern hair loss  
Male pattern baldness  
Hair loss (non-specific)

## HEADACHE

Tension-type headache  
Migraine

## LOW BACK PAIN

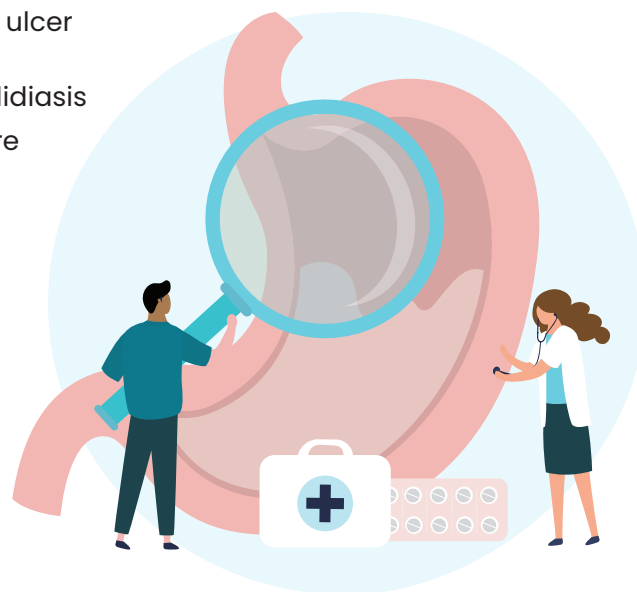

Low back pain  
Lumbar radiculopathy

## MASTITIS

Lactational mastitis  
Plugged duct  
Candidiasis, breast or nipple  
Unspecified breastfeeding disorder

## MOUTH SORE

Recurrent herpes labialis  
Angular cheilitis  
Aphthous ulcer  
Mucocele  
Oral candidiasis  
Mouth sore

## RASH

Tinea pedis  
Tinea corporis  
Tinea cruris  
Pityriasis versicolor  
Varicella  
Herpes zoster  
Pityriasis rosea  
Impetigo  
Folliculitis  
Insect bite  
Scabies  
Tick bite  
Lyme disease  
Poison ivy/oak/sumac  
Contact dermatitis  
Atopic dermatitis  
Urticaria  
Seborrheic dermatitis  
Keratosis pilaris  
Rash (non-specific)  
Cellulitis  
Paronychia of finger  
Reaction to COVID-19 vaccine

## SMOKING CESSATION

Nicotine dependence, unspecified

## STI EXPOSURE

Chlamydia exposure  
Gonorrhea exposure  
Trichomoniasis exposure  
Combined chlamydia and gonorrhea  
Combined chlamydia and trichomoniasis  
Combined gonorrhea and trichomoniasis  
Combined chlamydia, gonorrhea, and trichomoniasis

## URI

Acute nasopharyngitis  
Viral sinusitis  
Acute bronchitis  
Influenza  
Strep pharyngitis  
Bacterial sinusitis  
Allergic rhinitis  
Traumatic laryngitis  
Possible or suspected COVID-19  
COVID-19 testing in asymptomatic patient  
Asymptomatic patient, COVID-19 test NOT ordered  
Viral URI, cannot rule out influenza or COVID-19  
COVID-19, confirmed by viral test  
Reaction to COVID-19 vaccine

## YEAST INFECTION

Vulvovaginal candidiasis  
Bacterial vaginosis  
Irritant/contact vaginitis

## PEDIATRIC ACNE

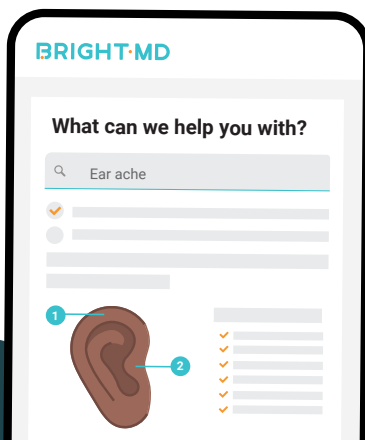

Mild comedonal acne  
Mild mixed acne  
Moderate to severe mixed acne  
Nodulocystic acne  
Rosacea

## PEDIATRIC BURN

Superficial burn  
Superficial partial-thickness burn  
Sunburn

## PEDIATRIC EAR CONCERNS

Viral URI  
Otitis media  
Otitis externa  
TMJ

## PEDIATRIC EYE CONCERNS

Allergic conjunctivitis  
Bacterial conjunctivitis  
Viral conjunctivitis  
Stye  
Chalazion  
Subconjunctival hemorrhage  
Blepharitis

## PEDIATRIC HEAD LICE

Pediculosis capitis  
Contact with and (suspected) exposure to pediculosis

## PEDIATRIC RASH

Tinea pedis  
Tinea corporis  
Tinea cruris  
Pityriasis versicolor  
Varicella  
Pityriasis rosea  
Impetigo  
Folliculitis  
Insect bite  
Scabies  
Tick bite

Lyme disease  
Poison ivy/oak/sumac  
Contact dermatitis  
Atopic dermatitis  
Urticaria  
Seborrheic dermatitis  
Keratosis pilaris  
Hand, foot, and mouth disease  
Cellulitis  
Paronychia of finger  
Reaction to COVID-19 vaccine

## PEDIATRIC URI

Influenza  
Viral URI  
Acute sinusitis  
Strep pharyngitis  
Croup  
Allergic rhinitis  
Hand, foot, and mouth disease  
Herpangina  
Possible or suspected COVID-19  
Viral URI, cannot rule out influenza or COVID-19  
Reaction to the COVID-19 vaccine  
COVID-19, confirmed by viral test

## Why health systems partner with Bright.md

**Attract patients**  
with on-demand  
care options

**Expand access**  
with low-cost  
convenience

**Cut costs**  
by decreasing  
expensive ED visits

**Save provider time**  
by treating low-acuity  
patients faster

The leading asynchronous  
telehealth solution loved by  
patients, trusted by providers
