About Remote Care Management

Remote care management programs use telehealth technology to facilitate clinically driven remote monitoring, care, and patient education. Programs include:

Remote Patient Monitoring (RPM)

A reimbursable service in which healthcare providers monitor patients outside the traditional care setting using digital medical devices, such as weight scales, blood pressure monitors, and blood glucose meters.

Chronic Care Management (CCM)

A billable service that may be furnished to patients with two or more chronic conditions. Healthcare professionals are reimbursed for the time and resources used to manage patient health between face-to-face appointments.

Generate Meaningful, Recurring Revenue

Prevounce helps ensure remote care management programs stay compliant and deliver financial results. Assuming a combined RPM and CCM program for eligible Medicare patients:

100 enrolled patients	X	\$113 per patient per month	X	12 months	=	\$135,600 annual revenue
300 enrolled patients	X	\$113 per patient per month	X	12 months	=	\$406,800 annual revenue
500 enrolled patients	X	\$113 per patient per month	X	12 months	=	\$678,000 annual revenue

CPT 99454 and 99445 (RPM) reimburse at \$47 per patient per month

CPT 99490 (CCM) reimburses at \$66 per patient per month

Flexible Partnership

"The flexibility that Prevounce offers has been a key factor in our success.

They've tailored their solutions to fit the unique needs of our practice, allowing us to maintain control where needed and outsource where it makes sense. It's a partnership that adapts to our practice, not a one-size-fits-all approach."

- Matt Germaine, Practice Administrator, Family First Physicians
