Oneview / the connected care experience company

Personalized Patient Experience at the Bedside

Give your patients access to education information, entertainment and self-service functionality — all from a tablet right at their bedside. MyStay Tablet easily integrates with MyStay TV, serving as a control pad for patients.

Entertain and Educate

Provide patients a hotel-like entertainment experience and on-demand access to personalized health information and educational content in 25 languages.

Self Service Applications

Give patients control over services like meal ordering, room controls and service requests from a tablet at their bedside.

Engage for Feedback

Capture your patient's real-time input on their care experience so that you can adjust their care as needed throughout their stay.

Features

Facilitate Virtual Care	Integrate your existing virtual care system for family visitations, specialist consults and more via tablet application.
Integrates with EHR & Nurse Call	Integrates with your EHR & Nurse Call to ensure patient information is automatically up to date based on the patient's record.
Configurable Education Content	Provide patients educational content about their condition, treatment and recovery in 25 languages.
Entertainment On Demand	Give patients access to calming audio content, movies and television shows and more through our hotel-like entertainment package.
Meal Ordering	Integrates with leading meal ordering vendors, allowing patients to directly order meals that meet dietary needs and preferences without verbally ordering from a nurse.
Room Controls	Enable patients to control their environment including lights, shades and temperature for hospitals with building automation.
Service Requests	Patients can request non-clinical services with requests sent directly to the appropriate team for fulfillment.
Configurable Patient Feedback Surveys	Collect real-time patient feedback through micro-surveys. Questions are configurable.
