

## Simplify Hypertension Management. Enhance Patient Care

A fully managed, turnkey hypertension management solution for modern clinics.

### ● Hypertension is on the Rise — But Resources Are Stretched Thin

Meanwhile, patients need ongoing support and education to manage their blood pressure effectively.

Staffing shortages and administrative demands make it tough to keep up.

**55%**  
uncontrolled

**71%** of adults over 60 live with hypertension yet more than half remain uncontrolled

**8%** resistant hypertension

### Do More with Less A Fully Managed Remote Patient Monitoring (RPM) Solution

Cardiowell is an end-to-end RPM service designed to help clinics like yours succeed. Our all-in-one solution includes:

Comprehensive program design, implementation, training and onboarding

Cellular-enabled BP devices — no WiFi or Bluetooth setup needed

Remote monitoring software with seamless data sharing

AI powered real-time dashboards for patient management

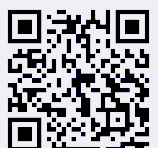

Proactive patient outreach, engagement and technical support

Billing, documentation, and compliance support

# Why Cardiowell? Benefits That Matter

cardiowell

## Increase Revenue

Earn up to **\$12,000/month** in additional revenue — fully reimbursable under Medicare CPT codes.

## Improve Patient Outcomes

Help patients lower their blood pressure by an average of **17 mmHg**, reducing complications, hospitalizations and enhancing quality of life.

## Save Staff Time

Requires less than **20 minutes per patient/month** - while we support a rapid launch and help patient onboarding reducing staff burden.

Your Success  
is Our Success

With just **150 patients**, your clinic could net **\$147,000** annually in additional revenue. Cardiowell helps you maximize reimbursement — without adding to your staff's workload.

## Setting Up Cardiowell is easy as 1, 2, 3!

- Step 1** Confirm eligibility and formally enroll the patient in the remote monitoring program
- Step 2** Provide a minimum of 10 min of documented remote care time per patient/month.
- Step 3** Verify that the patient records blood pressure readings on at least 2 unique days per month.

*Recommended by the American Heart Association and American Medical Association*

Cardiowell's protocols, workflows, and medical devices align with AHA and AMA guidelines. Our approach ensures timely interventions and improved patient outcomes.
