

About Us

Who we are, what we do, & why it matters

Who We Are

About Babyscripts: We are a clinically-validated solution that allows OB/GYNs and other maternal health care providers to deliver virtual prenatal and postpartum care via a mobile app and remote patient monitoring (RPM).

Our Vision: To eliminate maternal mortality and preventable maternal health complications through the use of technology and digital tools that support better pregnancies for all mothers.

→ **Mission:** Better Pregnancies

→ Founded in **2014**

→ **Obstetrics-specific** solution

What We Do

PERINATAL EDUCATION

Accessible, digital maternal education

BLOOD PRESSURE MONITORING

RPM for blood pressure to enable real time risk management & intervention

MENTAL HEALTH ASSESSMENTS

RPM for mental health to assess risk & areas of need

Why Our Mission Matters

1

Addressing barriers of access through remote solutions

- 46% of US counties have limited or no access to maternity care

2

Improving health equity through data-driven solutions

- Black mothers die at 2.6x rate of white peers

3

Eliminating preventable maternal mortality with intelligent reporting and monitoring

- 80% of maternal deaths are preventable
