

SDK, Software Development Kit

Develop your Spirometry and Pulse Oximetry App with limited effort and time

What is the SDK?

The SDK (Software Development Kit) is a software product that allows you to easily integrate MIR devices, spirometers and oximeters, with your app.

Ideal for remote patient monitoring, clinical trials and more.

Who is it intended for?

The SDK is intended for customers who prefer to integrate MIR devices to their own app, rather than using the one MIR provides with its devices.

Main features

\ Simple and intuitive development

Native languages only (Java/Kotlin, Objective-C/Swift). The SDK libraries reduce time-to-market, no specific skills on Bluetooth and/or USB communication are required, nor specific skills on algorithms for the interpretation of spirometry and oximetry.

\ Always up to date with **Spirometry Guidelines**

\ Not just measured values

The SDK provides:

- Predicted values, LLN and Z-Score calculated with GLI equations
- Acceptability messages and instructions for patients, according to the latest guidelines

5 Tools, Endless Development Possibilities

1. COMPLETE FVC TESTS

For apps designed to detect, diagnose and manage common respiratory diseases.

2. SVC TEST

Additional health surveillance required by many hospitals and clinics.

3. PEF & FEV1 TEST

1-Second Expiratory Flows to Develop Asthma and COPD Monitoring Apps.

4. CONTINUOUS FLOW MONITORING

Highly accurate respiratory flow detection, with sampling from 50 ms to 10 ms per flow point. Ideal for developing applications dedicated to clinical studies, respiratory rehabilitation and interactive solutions, including games.

5. PULSE OXIMETRY TEST

Real-time plethysmographic waveform and SpO₂% with BPM for oximetry monitoring apps.

SAMPLE APP SOURCE CODE INCLUDED

Instead of writing code from scratch, developers can copy and paste from the example app.

Developer Quick Start Guide always included, with best practices and tips!

What's included?

- Instructions for use (IFU)
- An example app with clear source code
- 2 demo units for tests
- Access to the dedicated MyMIR area with updates and useful resources

How to obtain the SDK?

1

Sign the license agreement and the NDA

2

Pay the license fee

3

Download the SDK and start developing!

Minimum operating system requirements

iOS
11.0 or higher

Android
6.0 or higher

Windows
10.0 or higher

Functions

With our devices and the SDK your workload is reduced to a minimum. We take care of the most complex processes, leaving to your application only a few essential tasks.

What our SDK does	Windows	MacOS	Android	iOS
USB communication	✓	✓		
Bluetooth BLE communication	✓	✓	✓	✓
Device information (firmware version, device type, etc.)	✓	✓	✓	✓
Real-time flow/volume and volume/time curves	✓	✓	✓	✓
Theoretical values (GLI equations)	✓	✓	✓	✓
Acceptability	✓	✓	✓	✓
Reproducibility	✓	✓	✓	✓
Quality grade (A, B, C, D, F, U)	✓	✓	✓	✓
Automatic interpretation	✓	✓	✓	✓
Firmware update	✓	✓	✓	✓
Real-time calibration	✓	✓	✓	✓
