

Steer Appointments

Patient scheduling and reminders that sync directly to your health record system and allow patients to schedule, modify, and cancel appointments without requiring your team's time.

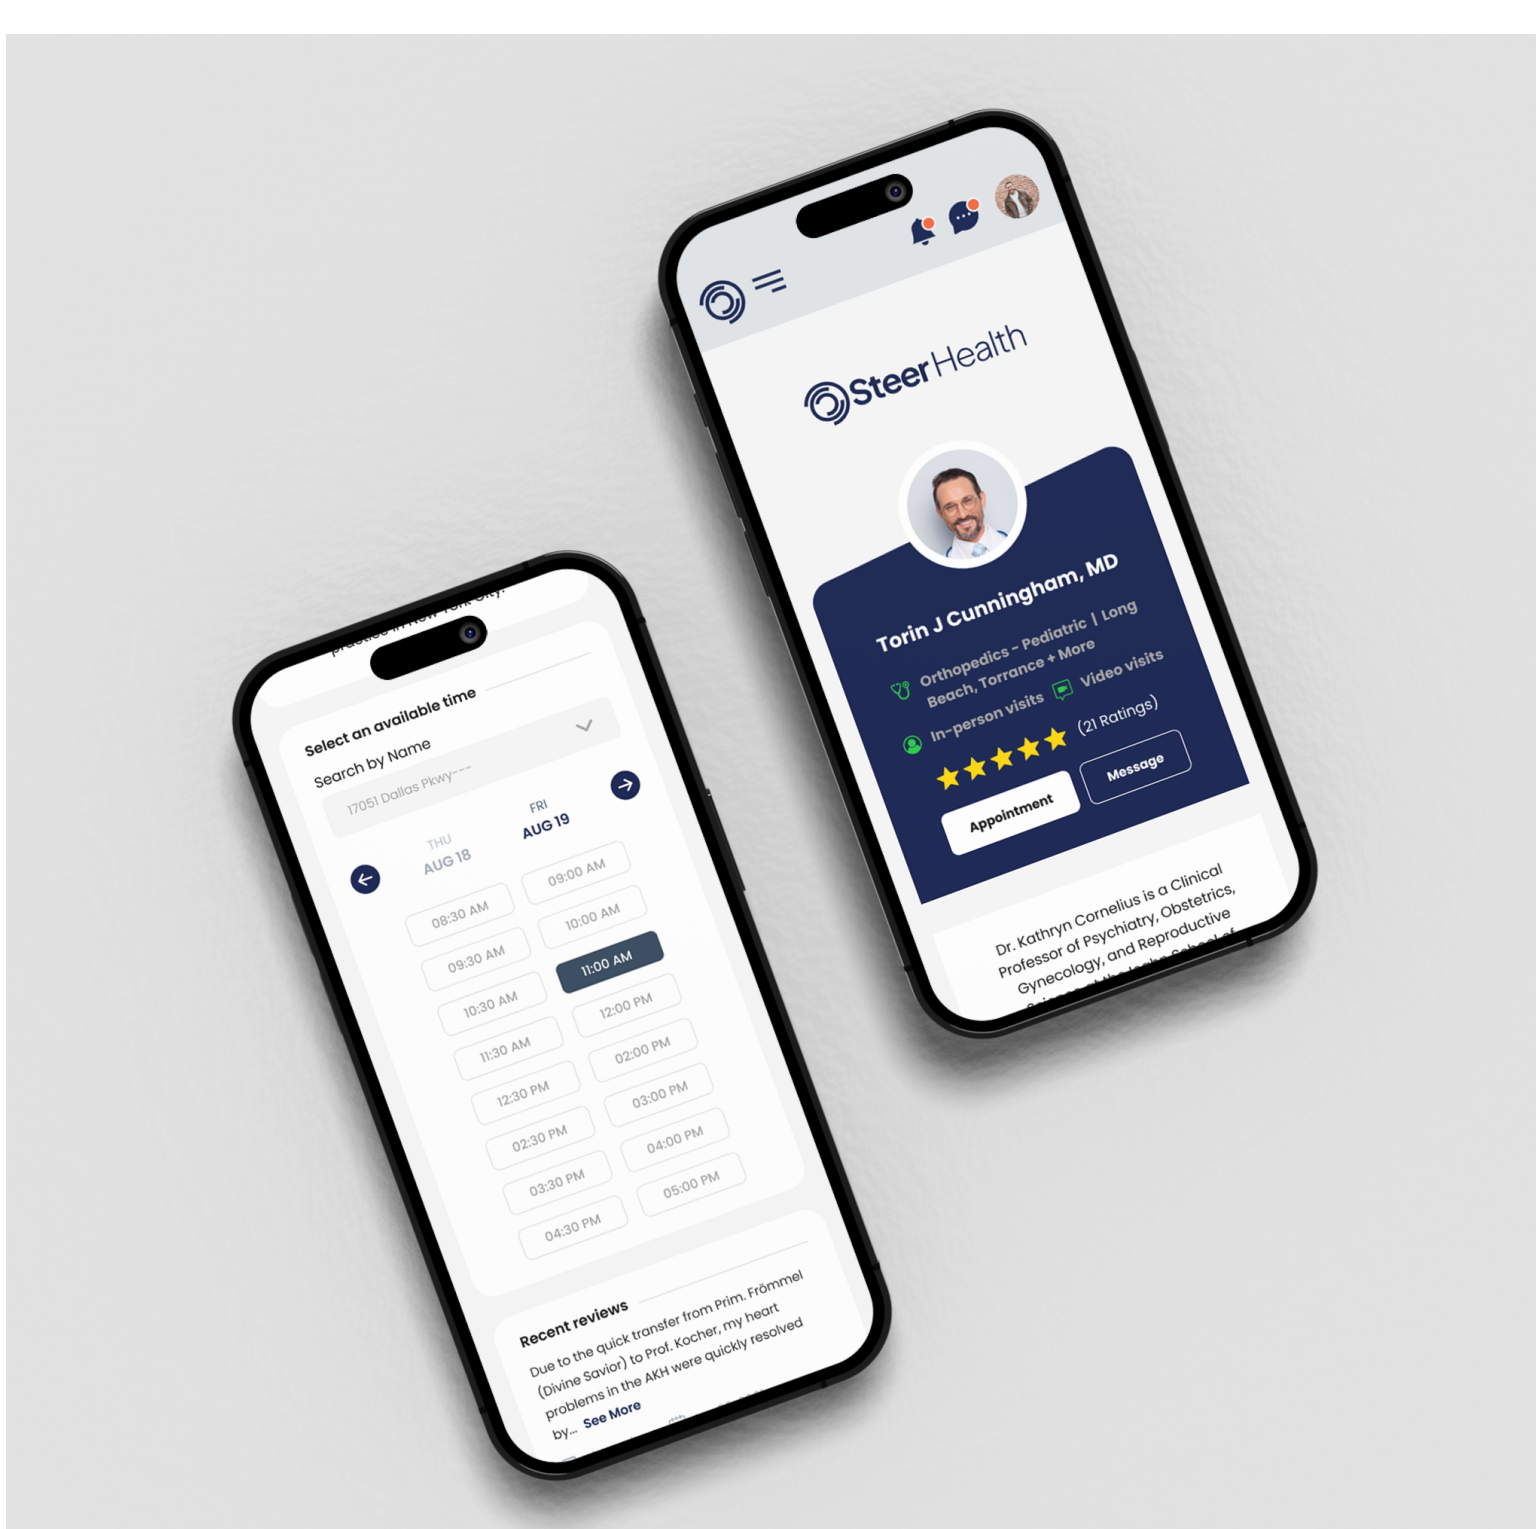

Build a custom calendar

Match your booking system with your appointment types, operating hours, and doctors' calendars — no matter how complex your practice schedule.

Put online patient scheduling anywhere

Let patients book an appointment via your website, social media channels, and SMS — no phone call needed.

One-click patient booking

Patients view your real-time availability and book in one-click. They automatically receive reminders and can re-schedule easily online.

Steer Health Online Booking is built for complex schedules. You can take advantage of many different customization options like appointment-specific working hours, custom appointment durations, rotating schedules, and more.
