

/ **SEARCH AND SCHEDULE**

Search. Schedule. Simple.

Attract new patients and easily manage workflows with digital search and schedule.

Finding care can be an overwhelming experience for patients, often leading them to delay seeking care.

Equip patients with digital tools that aggregate and accurately present provider information to allow them to easily find and schedule appointments.

Patients are eager to self-serve

Kyruus Health Product Analytics

Turnkey patient engagement

Patients can find and schedule the care they need when you combine robust filtering and sorting options with accurate provider, service, and location data in Kyruus Connect.

Support consumers searching for care

by leveraging natural language search logic, robust filtering and a clinical keyword library of over 37,000 terms to help patients find the right providers.

Gain insights to drive optimization

through robust analytics to understand how patients are finding and scheduling care.

Increase conversion with EHR integrated appointment booking that aggregates availability data in real-time, and uses pre-booking validation questions to ensure the right patients are scheduled.

Attract new patients by enhancing your organization's online presence with search engine-optimized profiles and extending reach through the Kyruus Network of health plans and care navigators.
