

## Personalized Patient Experience from a Television Screen

Utilize your existing in-room televisions to allow patients access to education information, entertainment and self-service functionality – all from an intuitive TV screen. This one-stop shop will keep your patients engaged for the duration of their stay.

### Entertain and Educate

Provide patients with a hotel-like entertainment experience and on-demand access to personalized health information and educational content in 25 languages.

### Self Service Applications

Give patients control over services like meal ordering, room controls and service requests from the TV remote they're already using.

### Engage for Feedback

Capture your patient's real-time input on their care experience so that you can adjust their care as needed throughout their stay.

<b>Facilitate Virtual Care</b>	Integrate your existing virtual care system via API for specialist consults and more.
<b>Integrates with EHR &amp; Nurse Call</b>	Integrates with your EHR & Nurse Call to ensure patient information is automatically up to date based on the patient's record.
<b>Configurable Education Content</b>	Provide patients educational content about their condition, treatment and recovery in 25 languages.
<b>Entertainment On Demand</b>	Give patients access to calming audio content, movies and television shows and more through our hotel-like entertainment package.
<b>Meal Ordering</b>	Integrates with leading meal ordering vendors, allowing patients to directly order meals that meet dietary needs and preferences without verbally ordering from a nurse.
<b>Room Controls</b>	Enable patients to control their environment including lights, shades and temperature for hospitals with building automation.
<b>Service Requests</b>	Patients can request non-clinical services with requests sent directly to the appropriate team for fulfillment.
