

AI-enabled Enterprise Visibility for Healthcare

- Keeping your people and assets **safe and protected**
- **Improving workflow** and reducing length of stay
- **Transforming experiences** for providers and patients

Enterprise Solutions

System-wide visibility to enable more informed data-driven decisions, increasing safety and improving workflow efficiency.

Asset Management

Enterprise-class equipment tracking including real-time asset utilization, PAR-level management, CMMS integrations, and workflow alerting.

Staff Safety/Assist

Staff Safety enables real-time notifications of who and where assistance and life safety response is needed in the case of staff duress call.

Mobility

Tracking and management of critical assets all through a mobile app that can send alerts and workflow events to key personnel.

Workflow

Optimize staff and patient workflow with automated alerts and milestones, along with advanced insights to improve processes.

Hand Hygiene

Monitor and report on hand hygiene compliance policies and behavior using real-time locating technologies tracking hygiene dispenser usage.

Staff Rounding

Digitize and automate nurse and specialist rounding to improve efficiency and ensure all patients receive recommended care.

Contact Tracing

Track contact between staff, patients, and visitors to protect your team and stakeholders from infection risk and continued spread.

Wander Management

Monitor and protect high-risk patients and residents with integrations to access control systems and resident life alert safety tech.

Command Centers

Enterprise-class dashboard reporting and analysis offering visibility at the department-, campus- or system-level.

Search & Find

Basic real-time location updates, search, and analytics, allowing customers to start in hours or days without breaking the bank.

Environmental Monitoring

Real-time temperature and condition monitoring to ensure environmentally sensitive items are always kept under recommended conditions.

Real-Time & Historical Analytics

Enterprise intelligence dashboards with insights and recommendations to improve efficiency, compliance and care delivery.
