

Introducing Body Pro

Empower Your Patients to Better
Manage Their Health

Healthcare is Evolving

Health care providers are looking for ways to support their out-of-reach patient population with convenient, reliable, at-home health solutions that give them greater control in managing their overall wellness. Responding to those needs, we have added cellular capabilities to our best-selling smart scale.

Why is cellular connectivity so important?

Cellular connectivity eliminates user setup as scales arrive pre-configured for the user, Wi-Fi nor smartphone needed & ensures you receive the data you need to support your user's progress.

Provide your patients with the best available scale and empower them with the same habit-forming features that have led Withings to industry-leading long-term engagement and user satisfaction.

2 Alternative connection options
when cellular is not available

95% of our scales are still in use
12 months after installation

4.5/5 Body user satisfaction

Body Pro Cellular encourages users to stay motivated with managing their weight.

13+ years of expertise manufacturing innovative & appealing designed devices, for the consumer market, helps us to continuously develop best-in-class devices that engage our users long-term.
