Virtual Care Road Map

Zero Download, Install or Plug-ins needed

- Browser-based Telehealth – no install or plug-ins. All that's needed is access to a browser on any device

- Best of kind HD-like video.

- Over 10 years in real-world usage with tens of millions of successful telemedicine session minutes.

- Easy integration with major Electronic Medical Records (EMR/HER) systems, such as Epic, MyChart, Cerner.

Secure Virtual Care Telehealth Simplified

- Virtual waiting room, admin log-in and transfer to doctor when ready.

- Virtual triage by nurse at time of virtual check in.

- Automatic bandwidth adjustment based on local constraints for rural areas.

- Secure HIPAA Compliant

About Us

- High-tech company Founded in 2006 by Noureddine Harche.

- Custom software products development and Technology consulting specializing in Digital Health systems with AI/ML.

- Contact our CEO to learn more about how one client reduced visit backlog by completing over a quarter of a million (250,000) telehealth appointments using Trusted Technologies "Telehealth Simplified" Solution.

Thank you.
