The In-Room Experience 2.0

Available in  **TOOLBOX** 2025

A **connected in-room digital experience** is your missing “linc” to improving patient satisfaction and outcomes. LincTV enables health systems to connect MyChart Bedside TV with patients via existing in-room televisions.

Your Linc to the Patient Bedside

Patients are watching. Transform your existing TVs into interactive digital hubs that connect patients to critical EHR information, motion alert sensors and virtual care to deliver a better experience.

EHR Integrations

Supports MyChart Bedside TV. LincTV participates in the Toolbox vendor program in the Epic Showroom.

Smart Room Capabilities

Connects pillow speaker patient control, in-room monitoring through integrated cameras, microphones, and motion alert sensors, facilitated virtual visits, video chat, streaming and other applications.

MyChart and Epic are a registered trademarks of Epic Systems Corporation

lineTV
is provided by **lineata**

When patients are in-room,
screen time is a **good** thing.

How LincTV Works

LincTV is a proprietary hardware device which transforms most existing hospital televisions into interactive digital hubs supporting MyChart Bedside TV, virtual nursing, alert motion sensors, and entertainment. The following is an example of LincTVs connectivity.

* Epic customers are instructed to contact their Epic representative and have them reference SLG 7083467 to identify which version of Bedside TV is best for their Epic version.

** LincTV is compatible with all grades of in-room televisions, including most retail grade TV's.

Power On. Power Up.
