

## Proactive Patient Care & Safety Dashboard

Ditch paper-based room status updates to reduce manual workflows for your care teams. Our digital door signs integrate with your EMR systems to automate patient and room status updates. By allowing your clinicians and support staff to easily view at-a-glance important care information in real time, you can ensure accuracy and improve collaboration while reducing clinician burden.

### EMR Integrated

With full integrations and automatic updating, you can provide care teams with the most up-to-date patient information and experience data so they can make decisions and take action with accuracy.

### Efficient Communication

With the right information right at your fingertips, you can access extra information such as precaution details to keep care teams and patients safe.

### Automated Workflows

From clinicians to room service to housekeeping, automate tasks to effectively communicate room by room needs.

<b>Real-Time Data</b>	Integrates with your EHR to ensure patient information is automatically up to date based on the patient's record.
<b>Up-to-date Care Team Assignments</b>	Display names, roles and photos of care team members for accurate assignment information.
<b>Configurability</b>	Easily support private and semi-private room occupancy and reflect appropriate support indications specific to your organization, workflows and room types.
<b>Security</b>	Optional authentication to access sensitive data or workflows, ensuring the device complies with your organization's security standards.
<b>Interactive Indications</b>	Edit non-clinical updates with a tap, allowing you the ability to communicate the room status to staff and visitors.
<b>Precaution Details</b>	Tapping a precaution tile provides you with details or processes that may be unique to your organization. These details are configurable to convey information you deem critical.
<b>Room Safety &amp; Cleanliness</b>	Keep safety and cleanliness information on the door sign until housekeeping visits a room after a patient has been discharged.
