Validic

Health IoT Platform

Validic's health IoT platform is the largest ecosystem of connected health devices and apps, efficiently streaming continuous, near-real-time personal health data from 570+ home health and wearable devices.

Access blood pressure, pulse oxygen, blood glucose, heart rate, weight, temperature, sleep, nutrition, respiration, activity data, and other vitals through a single, endpoint connection.

FEATURES

Bring Your Own Devices

With more than 180 connected blood pressure cuffs, glucose meters, continuous glucose meters, heart rate monitors, pulse oximeters, thermometers, peak flow meters, spirometers, weight scales, and other medical-grade devices, Validic can connect via Cloud API, Bluetooth Low Energy, and 4G/5G cellular connections. Validic offers the largest selection of devices to support your personalized care programs.

Health and Wellness App Ecosystem

Supporting activity trackers, nutrition trackers, smart watches, heart rate monitors, weight scales, sleep trackers, thermometers, and popular health data aggregators like Apple Health and Google Fit, Validic is the industry standard for access to the most comprehensive ecosystem of health and wellness apps and devices.

We integrate with all the top health device brands:

ACCU-CHEK®   Works with Apple Health   Dexcom   fitbit   GARMIN.   Google Health   iHealth

misfit   OMRON   Samsung Health   STRAVA   WITHINGS   Zewa®

Continuous & Aggregated Data with Low IT Investment

Validic's comprehensive device ecosystem efficiently ingests and streams continuous and aggregated data via a single, API connection. One integration provides access to 570+ device data sources without placing additional burden on your IT staff. We maintain the business relationships, technical updates, and ongoing support — including vendor agreements, third-party terms and conditions, bugs, and compliance with industry regulations and standards.

Why Validic health IoT platform?

Our ecosystem provides a robust and scalable architecture offering the ability to integrate summary or real-time data into your program.

Scale millions of connected users and process billions of data transactions per month.

Improve personalization of your program and connection with members.

As healthcare's first streaming platform providing unparalleled access to personal health data, Validic continues to innovate with data – providing the tools to support you now and in the future.
