

Solution Brief:

Bring Hospital Care Home

Studies show that providing medical care in patients' homes has a host of benefits, including lower hospital readmissions, improved outcomes, better patient experiences, and lower overall costs. But there are challenges. Organizations with hospital-at-home programs must navigate low reimbursements and complex logistical requirements that are made even more difficult by staffing shortages.

Success in home healthcare requires automating as much as possible with solutions like remote patient monitoring and ensuring the patient visits go as quickly and smoothly as possible so caregivers can make more stops. That's where mobile devices make all the difference. They lessen paperwork, enable fast collaboration with the care team, and improve workflows with solutions like smart routing.

Deliver Better Care with Apple Tools

Healthcare providers give the best care when they have powerful, intuitive tools like the apps on iPad®, iPhone®, Apple Watch®, and Mac®. Apple's powerful hardware is built to keep up with the demands of healthcare organizations to make work faster and more efficient. With easy and secure access to critical health information, healthcare teams have all the resources they need to make the best decisions for their patients. At home, iOS® and iPadOS® apps enable patients to stay connected to their care teams between visits.

Apple is Even Better with Stratix Managed Mobile Services

Stratix—an Apple Authorized Enterprise Reseller—can help you design, deploy, and support solutions leveraging the entire portfolio of Apple® devices and applications. We do everything for you so you can quickly implement solutions that'll improve your healthcare operations.

Mobile solution consulting – Our solution architects will work to understand your needs, challenges, and goals to craft a mobile blueprint that'll get you exactly where you want to go.

Project management – We're experts in administering large-scale mobile solution programs on-time and on budget.

Superior mobile deployment – Our U.S. advanced Mobile Integration Center kits and configures thousands of devices with a personalized out-of-the-box-ready experience.

Portals make it simple – Stratix offers ordering portals that give users an eCommerce-like experience for choosing equipment and delivery options.

Endpoint management – Devices can be managed remotely, providing security, customization, and easy updating.

itrac360 - Our proprietary asset management portal gives you 360-degree visibility of your entire fleet of mobile assets, enabling better analytics and control of your total cost of ownership.

Industry-leading support – Our on-shore 24/7 help desk is staffed by highly-trained experts who know your environment. We also offer rapid repair turnaround and spare pool management to minimize downtime.

Mobile Device as a Service - Mobile hardware, software, and services rolled into a convenient monthly per-device price moves CapEx to OpEx.

Why Stratix

As North America's premier enterprise mobility specialist, Stratix focuses exclusively on mobility services and has over three million devices deployed. We're the most-experienced pure-play enterprise mobility specialist in the U.S., and there's no one better to help you navigate the complexities of mobile. Our mission is to make mobile solutions convenient, easy, and cost-effective for our customers. We leverage over four decades of expertise to accelerate and inspire mobility transformation, and we've done it for some of the world's largest organizations.

Stratix's SmartMobile programs ensure that each customer has the right technology, tools, and support programs in place to stay ahead.
