

# SOLUTION SHEET

CAMP™ from Choice IoT provides a single pane of glass interface for deploying, monitoring, and managing all your devices. Intuitive, powerful and easy to use, built specifically around the needs of Solution Providers. Robust APIs provide instant access to all functionality. Latest wireless communication technologies including [4G LTE](#), [5G](#), [CAT-M](#) and [NB-IoT](#).

## Simplified Activations

Instantly Activate service with rate plans that fit your use case, speeding up the deployment process with plans & features customized for your solution, ensuring your users are set up correctly and quickly. CAMP is also accessible via any mobile browser allowing you flexibility to activate anytime from anywhere.

## Detailed Usage Reporting

Gain complete visibility and control of your usage with real time usage reports. CAMP provides usage by Month, Day and by session allowing you to be in control of your usage while maintaining control of your costs. No more bill shock.

## Real Time Alerts

With CAMP's fully customizable alerts, alert notifications can be set by User, BAN or Group. Always know when a line is getting close to your plan allocation, keeping you informed and reducing bill shock. Usage Start alerts for are available for back-up data devices.

## Improved Trouble Shooting

Improve Trouble shooting efficiency and reduce truck rolls, Remote [Network Reset](#). You can now instantly ping your device and have it re-establish connection with the cell tower. No more costly truck rolls

## Keep Track of Subscribers

Never lose track of where your solution is deployed with our subscriber and group name feature. Easily name and group your devices by User and company names. You can simply, with the click of the button change the information on the fly, allowing you to keep the most up to date information on hand.

## API Integration

Extend the power of CAMP to your platform with [Datalink](#). Datalink provides you with an API connection to help you simplify management of your connectivity while using your own platform.

## Detailed Coverage Check

Improve customer satisfaction with our detailed coverage tools. CAMP Provides you to see coverage down to the street level, with customer verified data, as well as provides you with specs on how far your location is from the cell tower.

## Device Query

[IoT Insight](#) provides quick access to your device information. With the click of a button, you can easily see all the information on your device, including, SIM, IMSI, available frequency bands and certification status, allowing you to quickly troubleshoot your devices, and improving customer satisfaction.

## CRM Functionality

CAMP's detailed Notes Feature keeps all your information in one central location, with ID tags to let you know who left the note. With Notes, you'll never lose customer info and make transition account support between employees even more efficient.

## Device Change Notifications with SIM Lock

Prevent misuse of your Solutions with Device Change alerts. Get instant notification whenever your active SIM attempts to connect to the wireless network in an unauthorized device. The optional SIM Lock feature will automatically suspend the line from service, providing you immediate protection from unnecessary overages.

## Ticketing

CAMP's self-service ticketing system empowers you to instantly Suspend, Restore, Swap SIMs, Order SIMs, Bulk Network Reset and more! You will never have to wait for someone else to action your request, you're in control.
