Expanding Virtual Healthcare to More People.

Life365 helps providers and payers leverage digital health solutions and expand virtual healthcare services to more people – easily and quickly.

Engage Patients Beyond the Traditional Point of Care

From weight loss programs to chronic care management, the Life365 Health App enables care providers and patients to stay connected and share actionable health data virtually.

Clinicians and health consumers have increasingly experienced the benefit and efficiency of access to virtual healthcare services beyond the doctor's office.

The Life365 Health app offers one of the easiest ways to connect and enhance virtual and in-person visits, seamlessly and efficiently.

The Benefit

- Engage patients between visits
- Promote patient self-management
- Increase patient satisfaction / loyalty
- Better data insights for clinicians
- Earlier intervention / better outcomes
- Increase revenue with CPT[®] codes

Who Can Benefit

- Chronic condition management
- Health coaching programs
- Remote health monitoring programs
- Health plan member engagement & health promotion
- Employee health & wellness programs

**One App.
Track All of
Your Vital Signs
and more.**

Simple. Seamless.

Easy to get started. Simple to use. Pair most devices in seconds to **automatically record vital signs.**

- 1 Providers invite patient to program
- 2 Patient downloads app
- 3 Patient pairs devices for automatic data capture (or manually enters data for “non-connected devices”)
- 4 Providers monitor data in clinical portal; Patients track data in the app

 Available for Apple iOS & Android

Flexible. Functional.

Life365 is a device and system agnostic platform. Our software works with hundreds of Bluetooth medical devices from a range of manufacturers.

We also deliver the data wherever you need it – or you can use our secure clinical portal. We offer multiple ways to view and share data.

- Share progress / export reports
- Charts and lists for viewing data
- Secure bi-directional messaging
