

# Chart Access

powered by JASE Health Solutions

When a patient is discharged to a nursing home or skilled nursing unit, providers at those facilities need an easy way to access hospital and clinic records for the patients. They also need a way to efficiently and effectively communicate with health system providers who are caring for patients at their facility.

Chart Access provides secure access to patient records and provider messaging for organizations providing care outside of a health system. This solution is currently available for health systems using Cerner Millennium® clinicals.

## Chart Access

The screenshot shows the Chart Access interface with a sidebar for filters and a main table of patients. The filters include PreVisit Form Status, Next Visit Date, and Next Visit Location. The patient table lists patients with columns for Patient, DOB, Gender, Next Visit, and Next Visit Location.

Patient	DOB	Gender	Next Visit	Next Visit Location
GRANGER, HERMIONE	Sep 10, 1949	Female		
LOVEGOOD, LUNA	Feb 22, 1950	Female	Jul 01, 2021 10:15AM	MAJUN-PWVC Provider
BLACK, SIRIUS	Oct 31, 1930	Male	Jul 01, 2021 3:15PM	MAJUN-PWVC Provider
POTTER, HARRY	Jun 20, 1945	Male	Jul 08, 2021 8:00AM	MAJUN-PWVC Provider
WEASLEY, RON	Jan 04, 1940	Male	Jul 09, 2021 11:10AM	MAJUN-PWVC Provider
HAGRID, RUBEUS	Jul 08, 1939	Male	Jul 12, 2021 7:40AM	MRAD

## FEATURES & BENEFITS

### ELECTRONIC ACCESS

Replaces the time consuming manual process of sending patient records with easy electronic access.

### PATIENT WORKLIST

Provides a worklist to help providers manage patients at their facility & view appointments by health system providers.

### SECURE MESSAGING

Communicates with health system care teams through a secure messaging feature. Providers view all messages in the Message Center.

### REDUCE COMPLIANCE RISK

Provides a way to securely share records while limiting it to only patients receiving care at an outside facility.

### PATIENT DOCUMENTATION

Complete patient documentation prior to scheduled visits. Chart Access saves in Cerner and pulls into the provider's notes.
