CHALLENGES WE SOLVE

1 Demand for highly personalized diet management is growing exponentially.

2 To manage this demand, companies need large datasets of meals with detailed nutrition and diet information.

3 Current providers either have small datasets or lack detailed nutrition data.

HOW WE ARE UNIQUE

1 We offer broadest and deepest dataset of recipes and foods in the industry with detailed, structured nutrient and diet data.

2 Our meal recommendation solution allows for real-time service with high degree of personalization at a very low cost.

3 We offer custom solutions for chronic conditions and special diets.

OUR PRODUCTS AND TECHNOLOGY

- Dataset of 5+ million recipes and 850,000 foods, all nutritionally analyzed and tagged

- Each item is tagged for 130+ nutrients and 40+ popular diets and allergens

- Real-time meal recommendation engine, leveraging proprietary search algorithms
