

Remote Inpatient **Telemetry**

Hicuity Health inpatient telemetry monitoring partners your technology and our clinical team to deliver a complete cardiac telemetry solution. The result is a technology-agnostic approach that reduces your recruitment, training, and operations headaches associated with 24/7 monitoring. We allow your nurses to fully focus on patient care.

BENEFITS

Simplified Operations

Affordable solution that eliminates management headaches associated with optimizing technology or hiring, training, and managing your telemetry team.

Flexible Solution

Ability to flex telemetry staffing dynamically to adjust to your current census and patient risk profile.

Improved Resource Utilization

Fully focus nursing staff on patient care by delegating critical monitoring to an experienced and trusted partner.

Tailored Solution

Flexibility to monitor all cardiac at-risk patients throughout facility or restrict to selected units. Integrates with your preferred workflows.

Highly Trusted

15+ years of telemedicine service and more than 110,000 monitored patients per year ensures an experienced, trusted partner.

Existing Platform

Our technology solution can integrate with all major telemetry technology, eliminating any need to buy and implement new hardware.

FEATURES
