

Problems We Solve

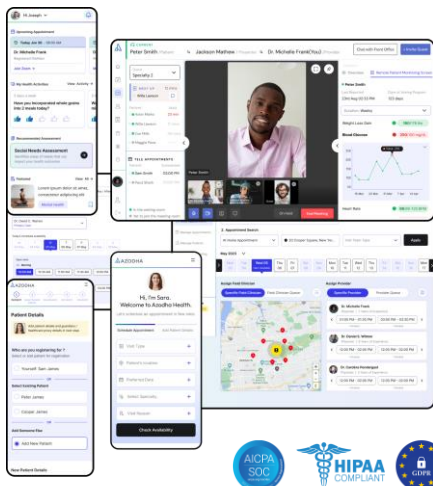

Supporting multiple client specific integration needs

Supporting multiple client specific features, use cases and workflows

Support innovation in care delivery and technology enablement

Azodha's API based platform extends Electronic Medical Record and Patient Management Systems to support new care delivery models like hospital at home, virtual care, digital health solutions, hybrid care, innovative clinic solutions and digital transformation.

As a white labelled platform, we extend your product capabilities so you can meet your clients where they are.

Our Impact & Client Feedback

Technology Implementation Cost & Time reduction by 70%

3X lower TCO with buy to build approach

Cost savings generated exceed platforms licensing cost

Improved patient & provider satisfaction

“Azodha's platform has indeed been a game-changer for the team at Care2U. Their seamless integration with our systems has greatly enhanced the delivery of our high acuity at home care. What truly distinguishes Azodha is their strategic collaboration, innovation, and adaptability to address our intricate requirements, significantly improving our CSAT, operational efficiency, and resource optimization. I wholeheartedly endorse Azodha for healthcare organizations aiming to elevate patient experiences, streamline operations, and establish a unique market presence.

Allen Dine

VP Operations @Care2U

“Our partnership with Azodha using their integration, digital health & AI platform for patient app has been highly constructive and rewarding. By incorporating the Azodha patient app into Welkin's platform, we've managed to fulfill our clients' patient-related requirements more efficiently. The extensive care management features of the app not only optimize care team workflows but also yield substantial operational efficiency and cost benefits. Azodha's in-depth knowledge of healthcare and their dedication to innovation have allowed us to provide personalized, high-quality care experiences that meet our clients' expectations seamlessly. Their detailed understanding and innovative approach have enabled us to address diverse patient-facing needs effectively. We are optimistic about sustaining success and reaching new heights in addressing our clients' needs with the comprehensive solutions offered by Azodha's platform. We look forward to continuous improvement and shared success in our collaborative ventures.
