

On-point patient education, at the point of care

Helping you more efficiently guide patients with enhanced care

Krames On FHIR® is a flexible application that enables you to deliver up-to-date patient education at the point of care. Using SMART on FHIR® technologies, it integrates smoothly into Epic® and directly into your workflow—while allowing you to provide content based on the patient’s profile and clinical encounter. You can also use it to deliver content through MyChart® or in print, helping your patients understand their condition and learn the skills they need to improve their own health.

Benefits for your clinical team

- Access continuously updated patient education developed using Krames best-in-class and evidence-based methodologies.
- Deliver Krames On-Demand® patient education to your patients through MyChart or in print.
- View the dates of the education materials that the patient has previously received.
- Customize the user experience per your preferences.
- Implement workflow enhancements, such as content suggestions per the patient’s health history, resource or favorite tagging, and folder access.

Benefits for your IT team

- Eliminate quarterly uploads of patient education, reducing the technical resources needed for maintenance and support.
- Adhere to the latest industry standard SMART on FHIR API standards.
- Facilitate implementation using our preapproved app.
- Meet regulatory requirements, as the application securely reads patient data from and writes data back into the EHR.

A functionality comparison for IT, clinical, and patient education stakeholders
