

Data-powered solutions for forward-thinking healthcare providers

The age of information and technology ushered in new expectations from patients, payers and other key stakeholders of how the health system should operate and communicate. As a provider, you are expected to simultaneously reduce costs of care, improve accessibility and equity of that care, and make the massive transition to a value-driven model of care delivery. To do this well, you need reliable, interoperable data solutions, personalized dashboards to your unique goals, and AI-informed insights to operate at the speed of healthcare, to name a few.

Create more ease and success in your change initiatives with an enterprise data enrichment platform and predictive, actionable analytics designed specifically for healthcare. Providers across the country rely on our scalable, seamless and transformational SaaS solutions to enable measurable impact for their organizations, and you can, too.

With MedeAnalytics Provider Value Analytics, you can:

- Enable a 360-degree view of member care with merged clinical and claims data
- Assess provider quality and performance to bolster contract negotiations
- Understand patient risk levels and opportunities to close gaps and improve outcomes
- Achieve complete data interoperability on the most robust cloud technology available
- Streamline and enhance access to data with easy drill-downs, standard and ad-hoc analysis, and augmented analytics (AI) capabilities

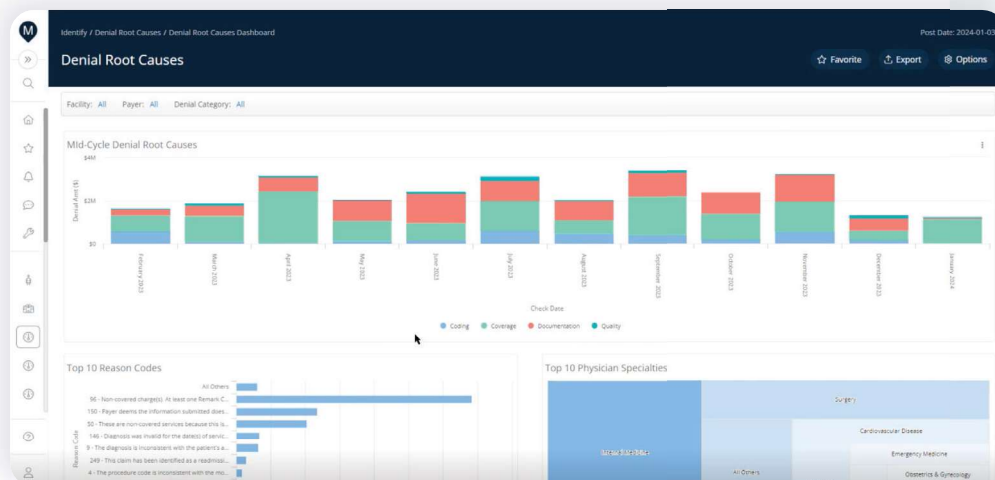

Why you need Provider Value Analytics

Provider Value Analytics solutions are self-service, vendor-agnostic, and provide exceptional user experience along with heavy-duty analytics capabilities. Data is integrated and enriched seamlessly and bidirectionally with any tech stack, augmented with visualization and AI, and delivered to the user in the form of real-time reports, high-level dashboards, and detailed drilldown features.

Learn how to infuse and use analytics more comprehensively throughout your clinical and operational processes to create better outcomes with a team that's dedicated to your success every step of the way.

Potential returns

- **15-25%** decrease in days in A/R
- **\$4M** savings on eligibility
- **40%** reduction in readmissions
- **15-21%** improvement in CMI

Powered by the first fully curated, healthcare-only, and turnkey data fabric

The concept of a data fabric directly addresses the unique need for better security, interoperability, and scalability in healthcare. MedeAnalytics designed a data fabric with providers' needs in mind, producing an advanced technology that seamlessly collects, analyzes, and shares data across different care settings. Supported by these capabilities, our platform empowers goal-directed decision making, smooth collaboration experiences, and continuous performance improvement.

Explore the full offering of AI/ML-powered solutions in our Provider Value Analytics suite:

Workforce Quality Insights

Link your front office actions to back-office outcomes to understand trends impacting financial and operational KPIs.

Productivity Analytics

Overlay tools on your EMR to automate the QA process in real-time, implement immediate interventions, and improve staff productivity.

Patient Access Insights

Elevate your patients' financial experience using pre-service workflow tools, seamlessly integrated to your existing technology.

Cost Insights

Examine claims- and encounter-level data to target controllable costs and align spending to outcomes and reimbursement.

Revenue Integrity Suite

Connect coding and CDI activities to reveal compliance risk, customize clinician education, and reduce denials.

Business Office Suite

Bring complex patient accounting data into a unified view to better understand cashflow and identify performance improvement opportunities.

Bring your own data.

We will do the rest.

With our advanced, multi-cloud foundation and robust data fabric, MedeAnalytics collects data from any source, normalizes it into a single source of truth, and provides powerful analytics-as-a-service solutions to complement your EMR and remove the swivel chair. Activate ALL of your data; don't just add another point solution.

By enabling your entire ecosystem with ultimate interoperability and turnkey analytics, MedeAnalytics is breaking down silos and ensuring you can get the most out of your data.

You can use Provider Value Analytics to:

Stop denials before they happen

Advanced analytics capabilities empower revenue cycle staff and management to proactively identify potential denials and address gaps resulting in faster revenue realization—and potentially reducing denials by 10-15%.

Collect more on self-pay accounts and reduce cost-to-collect

Collectability analytics prioritizes collections on accounts with highest propensity to pay, potentially increasing self-pay collections 11-17%.

Improve registration accuracy across sites of work

Review staff (onsite and remote) metrics to inform training, automation and process improvement to drive up to 20% improvement in registration accuracy. With visibility into their own productivity, registrars are motivated to take corrective actions before issues have a major impact on the revenue cycle.

Get a holistic view of organizational health

With expense and reimbursement data united into a user-friendly scorecard, you can get deeper on physician performance, coding trends, reimbursement rates, and service line operations.

Improve registrar engagement and performance

Real-time assessment of performance against short- and long-term measures allows for fair and consistent monitoring of registrar activities. With visibility into their own productivity, registrars are motivated to take corrective actions before issues have a major impact on the revenue cycle.

Secure overall financial health

Automate insurance plan eligibility, easily retrieve benefit information, validate demographics and verify medical necessity to boost your organization's financial sustainability. With comprehensive data analytics, you can utilize predictive modeling capabilities that enable charity care screening, authorization management, workload optimization, and more.

Decrease compliance take-backs and minimize audit risk

Robust risk rules engine proactively identifies areas of risk prior to an external audit, potentially decreasing audit risk associated with fines/penalties by 20-30%.

Achieve the full impact of your analytics investment

Provider Value Analytics includes value-add services to ensure your success.

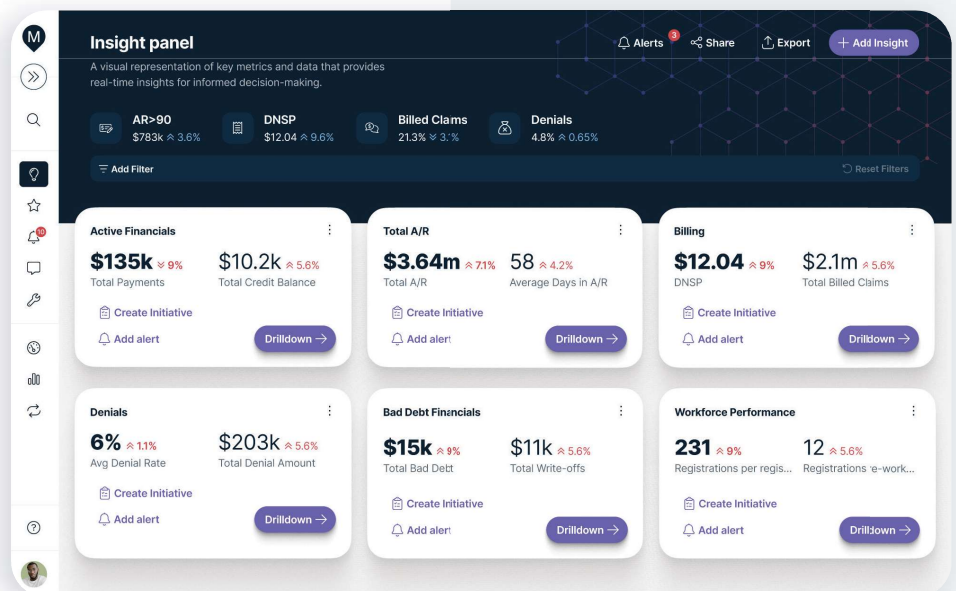

Managed Action™

Drive immediate action with integrated strategic initiative management tools that surface insights for executive view.

Improve strategy execution with action plans that define your objectives, align staff around shared goals, and track progress in a closed-loop system.

MedeConsulting

Rely on our consultants' vast industry expertise and collaborative, hands-on approach to accelerate and amplify value derived from analytics investments.
